for Therapists

**Bioinformative Medicine:  
Testing and Therapy**

**10/2017**

**[www.magnetotherapy.de](http://www.magnetotherapy.de)**

Welcome to the AMS!

Dear reader,

we are happy that your interest for electromagnetic therapy and bioresonance procedures led you to us.

With this catalog we would like to provide an insight into the possibilities of bioinformative treatment, introduce you to our product range and show how the different devices can be used individually or combined with each other.

Our devices are developed by Dr. rer. nat. W. Ludwig®, Institute for Bioinformative Medicine, Weikersheim.

Dr. rer. nat. Wolfgang  
Ludwig (1927 - 2004)

We continue Dr. rer. nat. W. Ludwig's lifework: In 1998 the AMS company purchased the complete technical know-how, all property and distribution rights from him.

**„Wolfgang Ludwig is one of the physicists that significantly influenced the Bioinformative methods in Germany. He had a significant impact to the fact that the german naturopathy still can claim its leadership role in the world.“**

Prof. Dr. F.-A. POPP in: Informative Medizin. S. 3, Essen 1999

Dr. rer. nat. Frank Beck

Managing director and sole shareholder  
of AMS GmbH

„When I met Dr. Ludwig for the first time, more than twenty years ago, being a promoted scientist myself, I mostly was able to follow his statements, but as I say, I lacked the faith to believe. However, the more I dealt with his research, the faster large parts of my scientific world view broke in pieces.

Dr. W. Ludwig is often called the „father of magnetic field therapy“. In his lifetime he shaped the term „Bio-informative transfer of information“ – a wording that describes the given biophysical situation in a widespread sense.

Today, I am not only proud to continue his work of life, but it still fills me with joy and happiness when I hear how helpful bioinformative medicine can be.“

**AMS GmbH**

Our cosmos – all living organisms, human beings, animals and plants – consists of only a one billionth part of solid matter, the atomic nuclei and the electrons around them.

In between is a lot of space that seems to be “empty”. This “empty space” is filled with electromagnetic waves.

These waves are in contact with each other and also with the outside world. They communicate.

**Dr. W. Ludwig's** (physician, 1927 – 2004) ambition was to generate with a device electromagnetic waves that the body will understand. They have to be **natural as in undisturbed nature** to be able to cause a reaction in the body. Therefore he did research about the environmental signals that surround us naturally (Schumann, Geomagnetic and Solar frequencies). His doctoral research study was about the influence of electromagnetic fields on the nervous system.

What does electromagnetic field therapy / Bioinformative Medicine mean and what is special about Dr. Ludwig's® AMS-devices?

Read about the characteristics of pulsating electromagnetic fields and how they can be used:

- Some **physics** background
- Physiological **environmental signals**: Schumann, Geomagnetic and Solar frequencies – signals that surround us naturally
- **Qualitative characteristics** of physiologically effective electromagnetic field devices
- **Possibilities for use** of magnetic field therapy

*Simply good vibrations!*

## Environmental Signals

# 1

In an intact environment, we are naturally surrounded by different oscillations, waves and frequencies that our organism is used to:

### Schumann Frequency

1952 discovered by the physician Winfried Otto Schumann.

This is a frequency that is permanently maintained between the earth's surface and the ionosphere through electrical discharge (thunderstorms and lightning). The result is a so called transversal magnetic wave with a fundamental frequency of **7,8 Hz – the Schumann frequency**. The range of its harmonics even reach the megahertz area.

A part of the brain of all mammals, the hippocampus, also oscillates with 7,8 Hz. Among other things the hippocampus is important for concentration and alertness.

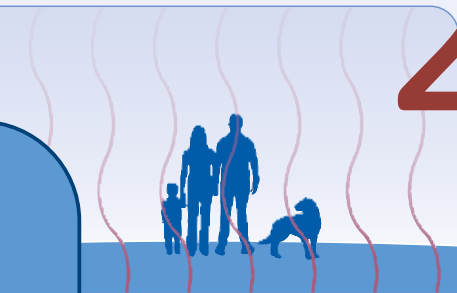

# 2

### Geomagnetic Frequencies

These are the natural oscillations of **64 trace elements** such as ferrite, natrium, calcium, etc. that are contained in the earth's crust. Each of these trace elements has its own characteristic oscillation pattern. The natural terrestrial magnetic field receives and transfers these oscillation patterns – called “modulation”. Thus in natural surroundings we are permanently in touch with the information of the trace elements.

According to measurements from geologists and medical scientists the earth's crust contains the same trace elements as the erythrocytes, the red blood cells – nearly in the same ratio with each other.

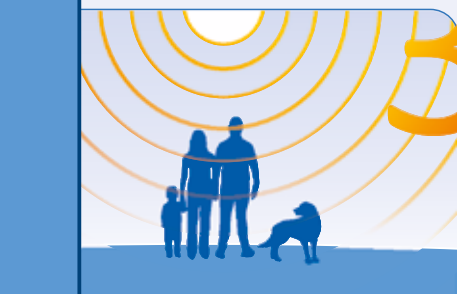

# 3

### Solar Frequencies

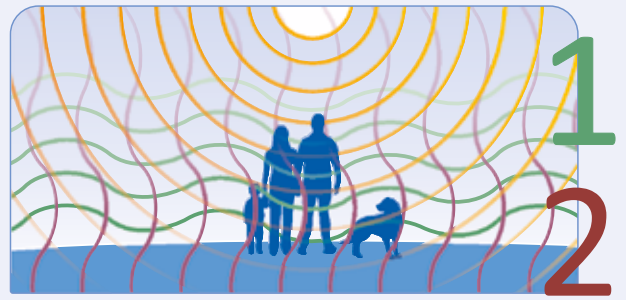

The sun is another source of important signals for us. It has manifold frequency spectra – most of them don't reach the earth's surface.

The atmosphere has two “windows” that let through different kinds of the sun's waves to the earth: **visible light**  
**ultrashort waves**

There is a **corresponding ultrashort wave to every visible light frequency**. These are the Solar frequencies.

We deliberately set aside a detailed scientific explanation of the effectiveness of electromagnetic fields in the course of this brochure – but if you are interested you can contact us for further information.

The ancient Traditional Chinese Medicine knew: Organisms need at least two environmental signals, a **Yang-Signal from above (Schumann and Solar frequencies)** and a **Yin-Signal from below (Geomagnetic frequencies)**.

To achieve this **Yin-Yang-Balance**, each of Dr. Ludwig's® devices generates the Schumann frequencies as well as the Geomagnetic frequencies. Additionally **all major devices** and the handheld devices **MEDICUR®**, **MEDICUR®color**, **METRONOM solar** and **METRONOM C** generate the solar frequencies.

*just read a little bit further :)*

## Qualitative Characteristics

To achieve a physiological effect from the generated waves, they must have certain characteristics. Particularly important are the **strength** and the **pulse form of the magnetic field**.

The American physician R. Adey found out that a low field intensity is already sufficient to have a physiological effect. Merely the physiological response threshold has to be reached – a stronger intensity can possibly even be counterproductive. Therefore the **magnetic field strength** of Dr. Ludwig's® devices is very low between 0.2 and 20 µTesla.

With the signal of his devices Dr. Ludwig® emulated the same form that nerve cells use to transfer their impulses in order to use a **pulse form** that is known for the body. It is characterized by a fast increase and after that a slow decay.

*only one section more*

## Possibilities for Use

Already in ancient medicine they cured diseases with so called "Magnetite" (natural loadstone). The principle was easy: Magnetic fields can improve the **body's ability for regulation**. Thus they can contribute to stimulation of **self healing processes**.

One of the most important frequencies – if not the most important of all – is the principal value of the Schumann frequencies, 7,8 Hz. It is a neutral frequency, balancing and benefitting concentration. We call it the "well-being frequency". A randomized, double-blind, placebo-controlled study could prove a highly significant effect and pain relief with the frequency 7,8 Hz on knee arthrosis. If you are interested you can ask us for the study.

Generally any frequency can be suitable for application. Some frequencies have proven their value for certain situations. For example there are stimulating or toning frequencies, whereas others are applied for relaxing.

Dr. Ludwig's® **handheld devices** have different **preset programs/frequencies** that you can select from. The **major devices (MEDISEND®super / MEDISEND®super C / MEDISEND®super III)** can be set on any frequency between 0,1 and 1000 Hz. You get specific information on that in the particular product brochures.

One of the characteristics of electromagnetic waves is their ability to receive and transport information. So our device's electromagnetic waves can be used solely as the pure **application signal** in the chosen frequency and additionally as a **carrier wave**. As a carrier wave it can transport exogenous (e.g. homeopathic remedy, Bach Flowers, Schuessler Salt and more) as well as endogenous (body's own) information.

For this purpose the handheld devices have an **ampule holder**. Major devices offer the possibility to connect a beaker (**MEDICUP**) for the transfer of information / substrate transients.

*done!*

# Magnetic field therapy – a short introduction to our variety of products

## Magnetic field therapy – what is it?

**What is meant by magnetic field therapy / bioinformative medicine?**

**Magnetic field therapy** helps the body to **regulate**. It is not about curing a certain illness - we do not want to and are not allowed to claim that - but our devices generate bioenergetic oscillations, which help stimulating the **processes of self-regulation**. The devices generate an **electromagnetic field**, which is transmitted to the body.

The **usage** is very simple: Depending on the device, either the connected applicator or the device itself is placed **on or beside the body**. The electromagnetic field penetrates the clothing and **flows through every cell**.

**Different frequencies** can be used. For example, an application may be **stimulating or soothing** or helpful for **electrosmog sensibility**. In addition to these examples, there are many other possible applications.

Our **hand-held devices** have **preset frequencies**, which are selected depending on the situation. The **large devices** do not have a preselection - they offer the possibility to set different frequencies in a **certain bandwidth** (0.1 - 1000 Hz) that can be chosen individually.

## Electromagnetic alternating fields

**Communication due to biophotons**

The communication in our body takes place with the help of **electromagnetic alternating fields**. In biophysics they are called biophotons. They have the function of a wireless information network, which controls the overall cell activity. Biophotons provide the basis for **bioenergetic self-regulation**.

The magnetic field therapy devices developed by **Dr. W. Ludwig** generate **alternating electromagnetic fields** which stimulate **regulation processes** and activate the **self-healing capacities**. The devices work with **weak, rapidly changing electromagnetic fields in the low and high frequency range** (in harmonic waves up to 10 MHz).

## Substrate transfer

### Transfer of substrat information

One of the characteristics of electromagnetic waves is that they are capable of **receiving and transporting information**.

It is the same principle as radio and television: A carrier wave is modulated, whereby images and sounds are transferred.

Thus the electromagnetic wave can be used in **two ways**:

- As a **pure application signal** with the corresponding selected frequency
- and in the sense of **bioresonance**, as a **carrier wave** for the transmission of information.

You can transfer both **endogenous** (body-specific) and **exogenous** (e.g. homeopathic remedies) information. Depending on the device, either the **MEDICUP** (cup connected to the large devices) or an **ampule holder** (for the small devises) is used.

## Why a device by Dr. Ludwig?

### What is special about the AMS devices from Dr. Ludwig?

It was important to Dr. Ludwig to develop devices that produce an artificial pulsating electromagnetic field that is **as close as possible to the natural field of the environment**. He wanted to make sure that the body is able to **understand** these signals.

That is why he has investigated thoroughly our environment with the fields that surround us naturally and developed magnetic field devices that simulate these **natural frequencies** as precisely as possible.

On the **previous double-page** you will learn more about our **environmental signals** (Schumann, Geomagnet and Solar frequencies) and the **quality characteristics** of the devices of Dr. Ludwig.

To this day, all of our devices are built according to the **specifications of Dr. Ludwig**. Thus they generate electromagnetic fields in different frequencies, which are easily understood by the body.

## The arrow symbol

All devices are based on the biophysical knowledge of **Dr. rer. nat. W. Ludwig, Institute for Bioinformative Medicine, Weikersheim**. The devices that are developed by Dr. Ludwig with the corresponding quality characteristics are identified with the **arrow symbol**.

## Our product range

We would be happy to help you find your way around our wide product range. For a better overview, we divided them into the following topics:

### Large devices:

- Find out more about our **MEDISEND®super devices** for the application of a magnetic field (p. 10-17)
- With our **WAVE TRANSFER devices** you can transfer information from substrates in an analog or digital way to carrier media (p. 20-23)
- The **AMScomsystem** lets you use digitalised substrates (**BIOWAVES**) for the application (p. 24-29)

### (Laser)light and color devices:

- The **COLOR-Punctur** combines light and pulsating magnetic field. It joins twelve different colors and magnetic field frequencies (p. 34-37)
- The **CEPES-Laser®** is one of our most popular devices. Like no other laser it combines its laser light with a pulsating electromagnetic field (p. 38-43)

### Hand-held devices:

- **MEDISEND®, MEDISEND®protect, MEDICUR®pro, METRONOM solar, METRONOM C** and **MEDICUR®color** are small and handy and are used both in practice and at home (p. 44-50)

### Water treatment:

- For our health there is nothing more important than pure water. With our **spring-time®420 pro** you can get your own source of clear, energized water to your home or your practice (p. 51-55)

### Accessories, tensors

- There is even more to explore (p. 56-59)

## Visit us in the World Wide Web

If you have access to the **Internet**, please visit our **website** [www.magnetotherapy.de](http://www.magnetotherapy.de).

Here you can find more information like:

## calendar of events

We regularly attend **exhibitions and seminars** (mainly in Germany), where you can get to know us personally and enjoy the equipment. Or visit us in Weikersheim. Don't forget making an appointment for a visit.

## Newsletter

Once or twice a year you will be informed about the news around the AMS with our **e-mail newsletter**. To register, please fill out the form on our website or simply write us an e-mail ([info@ams-ag.de](mailto:info@ams-ag.de)).

We are looking forward to hearing from you!

## Our Team

From left to right we are:

Eva Niesel, Angelika Beck, Tara Beck, Tina Först, Dr. Frank Beck, Anne Kessler

### Dr. rer. nat. Frank Beck

**Managing Director and sole shareholder of AMS GmbH as well as head of the „Institute for Bioinformative Medicine Dr. Ludwig“**

As head of the AMS, Dr. Beck takes all strategic decisions and has always an open ear for suggestions for improvement and new ideas. He is fascinated by the combination of scientific facts with naturopathic procedures and over the years he has acquired a broad knowledge in bioinformative medicine. If you would like to get to know Dr. Beck, simply visit him at one of the many fairs where he is personally present as an exhibitor and often as a speaker.

### Tina Först

**Naturopath, Dipl.-Bw. (FH) M.A., Marketing, Head of Export**

All our foreign correspondence goes through her hands. Furthermore she takes care of our printed papers as well as of the content and maintenance of our website. It is highly likely that you will hear your friendly voice on the phone when you call us and need information. Several times a year she is working on exhibitions and fairs where she represents the AMS company with a stand. Beyond that she assists many of our seminars to be your contact person.

### Anne Kessler

**Head of Accountants, Organisation of Exhibitions and Seminars**

It is responsible for all payment transactions as well as the preparation of accounting. Furthermore she processes the orders, handles the incoming repair tasks and preparation for the seminars. Mrs. Kessler gives always friendly advice and a helping hand for our customer's needs. She also attends some of our seminars to help the instructors assisting the participants.

### Angelika and Tara Beck and Eva Niesel

**Order Management, Organisation of Exhibitions and Seminars, Dispatch preparation, Controlling devices, Inventory Control**

Without our three diligent helpers, working days would be difficult for us. All three care about the orders and any form of dispatch preparation and warehouse management. They are also occasionally present at trade fairs and seminars where they actively support Dr. Frank Beck and Tina Först.

## MEDISEND®super III

our best! Pulsating magnetic field and Bioresonance

pulsating electro-  
magnetic field for  
application and →  
information transfer

Frequency spectrum  
0.1 - 1000 Hz →

built-in speaker →

two directional →  
inductors

analog und digital  
substrate transfer →

built-in battery →

The **MEDISEND®super III** is the flagship of the large magnetic field devices developed by Dr. W. Ludwig.

It fulfills the highest quality requirements and offers the combination of:

- Pulsating magnetic field
- Bioresonance procedures

### The MEDISEND®super III...

is developed by Dr. rer. nat. W. Ludwig, Institute for Bioinformative Medicine, Weikersheim. You use the **pulsating electromagnetic field** as an **application signal** and additionally as a **carrier wave for exogenous and endogenous bioinformation/substrates**. Together with hundreds of users Dr. Ludwig found specific frequency programs for a multitude of applications to stimulate the self-healing capacities.

has - in contrast to the **MEDISEND®super** and **MEDISEND®super C** - **two frequency generators** which can be controlled independently of each other. They each produce a frequency bandwidth of 0.1 - 1000 Hz. It offers further possibilities for more frequency modulation.

has a **built-in loudspeaker**, which makes the frequencies audible if required.

offers two outputs to connect special applicators that emit the electromagnetic field. They are called **directional inductors**. Their technology is unique - they produce an extremely homogeneous magnetic field with a high density of field lines.

gives the possibility to connect a **MEDICUP** as well as **hand electrodes**. These allow you to transfer **analog** information **to the magnetic field** - such as **exogenous** (e.g. homeopathic remedies) and **endogenous** (body-specific) information.

includes furthermore a **digital interface** to be connected to the software **AMScomsystem** to work with digitalized bioinformation (**BIOWAVES**). This allows you to use the digital information for transmission, testing and application as well as transferring and storing it onto the small **METRONOM C** device.

prevents electrosmog and its transmission due to its **built-in rechargeable battery**. This is decisive for electrosensitive people and for the transfer of endogenous and exogenous bioinformation.

## Improving the ability of regulation

The handling of the **MEDISEND®super III** is very simple: Use the two rotary knobs to set the **desired frequencies**, which you can either test with a **suitable test method** or take from the delivered **list which is based on experiences** from numerous of therapists. Then you start the device. The connected **directional inductors** emit the pulsating magnetic field with the selected frequencies. Usually you use two frequencies. In this case not only the two frequencies are transmitted but at the same time also **the sum and the difference** of the two chosen frequencies. This means that you work with **four frequencies simultaneously**, which are emitted by both directional inductors at the same time. You can use the inductors on the supplied tripods and place them for example at the **head and at the foot of a therapy table** for the application. The **effective range** of the facing each other directional inductors is approx. **2 m / 6.6 feet**.

← Usage

By connecting the **MEDICUP** and the **hand electrodes**, the **MEDISEND®super III** is very suitable for transferring **exogenous** (e.g., homoeopathic remedies) as well as **endogenous** (body's own) bioinformation with the pulsating magnetic field and thus using them during the application.

← Bioresonance

The power supply is provided by a **rechargeable battery**. With a switch you disconnect the device from the power supply. That ensures that **no additional electrosmog** is generated and transmitted during the application.

An application usually takes **15 minutes**, longer or shorter duration is also possible.

You can use the pulsating magnetic field as a **stand-alone application** or **combine other regulative methods** with it. For example, you can do reflexology during the application of the magnetic field or use the time for the duration of an acupuncture session.

Before and after the application drinking **plenty of clear water** will help drainage and cleansing.

The **MEDISEND®super III** has **two separate frequency generators**. The frequencies are set using a rotary knob for each of them. You can set the frequencies in the range of 0.1 up to 1000 Hz. The **harmonics** emitted by the **MEDISEND®super III** reach up to the **MHz range**. Thus it generates all **RIFE and CLARK frequencies** up to 10 MHz.

← Frequencies

Furthermore, you have the choice between **two frequency sweeps/scans**: 1000 to 1 Hz and 100 to 1 Hz. In these cases, the device runs through all frequencies within the selected bandwidth within approx. eight seconds. The frequency sweep starts at 1000 or 100 Hz, passes through all frequencies down to 1 Hz and then starts again from the beginning. Thus the body is offered a wide range of frequencies to **stimulate the regulation**. The frequency scans are often chosen to **support detox procedures** or to **start a series of applications**.

You can use the provided **list that shows you a lot of experience data** to select the frequencies for the application. For complex questions, it is useful if you support the selection of the frequencies by a **test procedure**, such as testing with a tensor, kinesiology, EAV or RAC.

← Selection of frequencies

The AMS regularly offers a **tensor seminar** once or twice a year where you can learn how to use the tensor. The seminar takes place in the South of Germany and is held in German language. Dates and more information can be found on our website **www.magnetotherapy.de** in the menu item **Seminars**.

In addition to the different adjustable frequencies (among others it is always possible to set **7.8 Hz, the main value of the Schumann frequency spectrum**), the **Geomagnetic frequencies** and the **Solar frequencies** are always also generated by the **MEDISEND®super III** - **regardless** of the frequency you choose for the application.

← Environmental signals

Schumann, Geomagnetic and Solar frequencies are our natural **environmental signals**. A detailed description for these signals can be found on page 4/5 in this catalog or on our website **www.magnetotherapy.de** in the menu item **Basics of the magnetic field therapy**.

Directional  
inductors

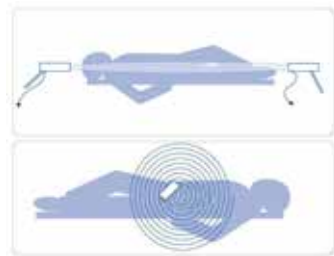

**MAGNETO directional inductors** and the **MAGNETO-ring** for transmitting the pulsating magnetic field (both included in the scope of delivery):

In order to be able to applicate the electromagnetic field, an applicator has to be connected to the device. The **MEDISEND®super III** is the only device to connect two **MAGNETO-directional inductors** to. The MAGNETO-directional inductors generate an **extremely homogenous magnetic field with a high density of the field lines**. They are supplied with two stands, so that you can position them individually according to your requirements. The **MAGNETO-ring** can be connected to any **MEDISEND®super** device. It is a flexible applicator for large areas and is placed onto or close to the body.

Ring

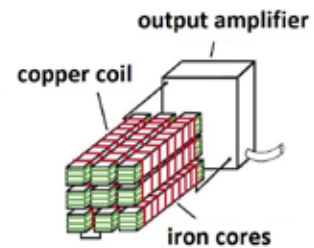

Application lying:

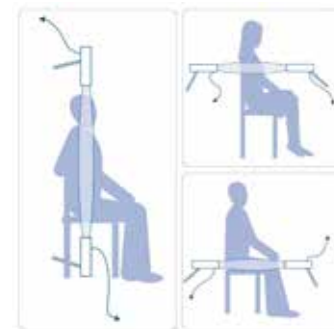

For application, the **MAGNETO directional inductors** can be placed differently. If they are located at the **head and foot end**, the magnetic field penetrates optimally through the **entire organism** - in particular, they reach the spinal column with all nerve, blood and lymph channels. If they are arranged facing on the **crest/buttocks** or e.g. placed in the **chest or lower body section**, the magnetic field flows through the spine, abdomen, chest, shoulder and leg area.

Both directional inductors each contain **nine coils** (see illustration on the right). Each of the coils consists of **eleven structure-modified iron cores**. Due to the structure modification, these iron cores contain the oscillations of **64 important trace elements (Geomagnetic frequencies)**. These are always transmitted to the pulsating magnetic field during application at any frequency you have set.

Structure of a directional inductor

Application sitting:

In order to use the magnetic field as a **carrier wave for bioresonance**, it is possible to connect a **MEDICUP** and the **hand electrodes** to the device.

A pulsating electromagnetic field has the ability to **transport and transmit information**. This is comparable to the radio waves coming from the television or the radio: Here, a transmission of picture and sound is transferred by a modulated carrier wave (e.g. FM frequencies). Within the sence of bioresonance according to Dr. W. Ludwig, the pulsating electromagnetic field is additionally used as a **carrier wave** for bioinformation. It is called transfer of **exogenous** (foreign to the body) or **endogenous** (body's own) bioinformation.

MEDICUP for  
exogenous  
information

**MEDICUP** for the transmission of exogenous information (optionally available):

To transfer exogenous information, place the medication (e.g. any homeopathic remedy) into the connected **MEDICUP**. As soon as you have started the device, the electromagnetic field acts not only as an **application signal**, but also as a **carrier wave** for the information that is inside the MEDICUP. The transmission of information is **independent** of the frequency you choose: **Any frequency** is a carrier wave and can be used for **transmitting bioinformation**.

As with the selection of the frequency, it is also advisable to use a **suitable testing method** to choose the substrates that you want to transfer.

Hand electrodes  
for endogenous  
information

**Hand electrodes** for the transmission of endogenous information (optionally available):

**Endogenous (body's own) information** can also be transmitted with the pulsating electromagnetic field by connecting hand electrodes to the device. Via the **symmetrical skin contact** (right and left half of the body), the endogenous bioinformation is tapped/scanned by the hand electrodes and returned to the body with the electromagnetic field in the form of „**attention signals**“ in the sence of bioresonance.

The application of the pulsating electromagnetic field in **combination with endogenous and exogenous information** supports especially any **detox processes**.

## Digital transfer with the AMScomsystem- The optimal supplement to the MEDISEND®super III

With the **MEDISEND®super III**, it is possible to use not only analog but also **digitized substrates for the exogenous transmission** of information. For this purpose we developed the software **AMScomsystem** and digitized over 6,000 substrates (homeopathic remedies, Bach flowers, nosodes, phytotherapeutics, etc.). These digitized information we call **BIOWAVES**, which we have put together in eight different packages. You control your **MEDISEND®super III** with the **computer** and transfer the selected BIOWAVES as an **exogenous bioinformation** during the application using the magnetic field.

## Combination with small devices

Two of our handy **small devices** can be combined particularly well with the **MEDISEND®super III**:

### CEPES-Laser®Vario:

It is connected to the **MEDISEND®super III** with its cable and is used simultaneously with the application of the electromagnetic field. The red-light laser emits a pulsating magnetic field at the frequency set at the **MEDISEND®super III**, as well as all exo- and endogenous bioinformation provided by the MEDICUP and hand electrodes.

### METRONOM C:

One of our practical small devices. It has five Programs and provides a storage space where you can save a BIOWAVE digital information with the **MEDISEND®super III** in combination with the **AMScomsystem** software. During the usage of the **METRONOM C** device, the stored BIOWAVE can be patched in to each of the five programs. The information of the BIOWAVE is modulated on the emitted magnetic field and thus transferred by it. It is ideal for therapists as a loaner for patients.

**Good to know: If you buy a large and a small device together, you will receive a 10% discount on the small device.**

Learn more about the **AMScomsystem** (p. 24 ff.), **CEPES-Laser®Vario** (p. 40 ff.) and **METRONOM C** (p. 49) in this catalog or in the particular product brochures. You find a complete listing of all digitized BIOWAVES in our **BIOWAVE catalog**. Please email us to ask for the documents or visit our website for download: [info@ams-ag.de](mailto:info@ams-ag.de) / [www.magnetotherapy.de](http://www.magnetotherapy.de)

# MEDISEND®super III

## Technical Data:

<b>Magnetic field frequencies:</b>	Two frequency generators with a band width of 0.1 - 1000 Hz / two frequency sweeps/scans: 1000 - 1 Hz and 100 - 1 Hz
<b>Physiological effective range:</b>	up to 2 m / 6.6 feet in diameter
<b>Battery:</b>	built-in rechargeable battery
<b>Weight:</b>	2.5 kg / 5.5 pounds without applicator
<b>Size:</b>	30.3 x 28.0 x 11.5 cm / 11.9 x 11 x 4.5 inches
<b>Scope of delivery:</b>	<b>MEDISEND®super III</b> , applicators (two MAGNETO-directional inductors each with tripod, flexible MAGNETO-ring), battery charger, two connecting cables for laptop and METRONOM C, manual
<b>Not part of the scope of delivery:</b>	MEDICUP, hand electrodes, METRONOM C, CEPES-Laser®Vario, Laptop and AMS-comsystem software. You can purchase these items <b>optionally</b> .
<b>Warranty:</b>	2 years
<b>Accessories (optional):</b>	
<b>MEDICUP:</b>	bipolar cup (height 7 cm / 2.8 inches, diameter 5.5 cm / 2.2 inches), connecting cables (18 cm / 7.1 inches)
<b>two hand electrodes:</b>	consisting of V2A steel (length 12 cm / 4.7 inches, diameter 3 cm / 1.2 inches), connecting cable (2 m / 6.6 feet)

Order No. MEDISEND®super III: 204

Order No. MEDICUP: 501

Order No. hand electrodes: 503

The **MEDISEND®super** and the **MEDISEND®super C** are two of the most popular magnetic field devices developed by Dr. W. Ludwig used in practices and clinics.

## First of all:

The devices **MEDISEND®super** and **MEDISEND®super C** differ in only one feature: The **MEDISEND®super C** has an interface to connect a computer with the **AMScomsystem**. Thus it is possible to use **digitized remedies** for application. You find more information about the **AMScomsystem** from page 24. Apart from that interface they are identical devices with the **same functions and settings**. An upgrade with the interface for a **MEDISEND®super** is not possible.

The **MEDISEND®super** devices combine proven methods of natural and experiential medicine:

- Pulsating magnetic field
- Bioresonance methods

## MEDISEND®super and MEDISEND®super C...

are developed by Dr. rer. nat. W. Ludwig®, Institute for Bioinformative Medicine, Weikersheim. You use the **pulsating electromagnetic field** as an **application signal** and additionally as a **carrier wave for exogenous and endogenous bioinformation/substrates**. Together with numerous of users Dr. Ludwig found specific frequency programs for a multitude of applications to stimulate the self-healing capacities.

have each one **frequency generator** with the frequency bandwidth of 0.1 - 1000 Hz. Both devices offer further possibilities for more frequency modulation.

use the **MAGNETO-loop** as an applicator for applying the magnetic field. The loop is uncomplicated in handling and more handy than e.g. a large mat.

prevent electrosmog and its transmission through the **built-in rechargeable battery**. This is decisive for electrosensitive people and for the transfer of endogenous and exogenous bioinformation.

give the possibility to connect a **MEDICUP** as well as **hand electrodes**. These allow you to transfer **analog information to the magnetic field** – such as **exogenous** (e.g. homeopathic remedies) and **endogenous** (body-specific) information.

The **MEDISEND®super C** includes a **digital interface** to be connected to a laptop with the software **AMScomsystem** to work with **digitalized bioinformation** (BIOWAVES). This allows you to use the digital information for transmission, testing and application as well as transferring and storing it onto the small **METRONOM C** device.

## Improving the ability of regulation

The handling of the **MEDISEND®super devices** is very simple: Use the rotary knob to set the **desired frequency**, which you can either test with a **suitable test method** or take from the delivered **list which is based on experiences** from different therapists. Then you start the device. The connected **MAGNETO-loop** emits the pulsating magnetic field at the selected frequency. Place the loop on or close to the body to transmit the pulsating magnetic field. The **physiological range** reaches up to **2 m / 6.6 feet** in diameter.

← Usage

The devices are very suitable for transferring **exogenous** (e.g., homoeopathic remedies) and **endogenous** (body's own) bioinformation with the pulsating magnetic field and thus to use them during the application.

← Bioresonance

The power supply is provided by a **rechargeable battery**. With a switch you disconnect the device from the power supply. That ensures that **no additional electrosmog** is generated and transmitted during the application.

An application usually takes **15 minutes**, longer or shorter duration is also possible.

You can use the pulsating magnetic field as a **stand-alone application** or **combine other regulative methods** with it. For example, you can do reflexology during the application of the magnetic field or use the time for the duration of an acupuncture session.

Before and after the application drinking **plenty of clear water** will help drainage and cleansing.

The **MEDISEND®super devices** each have one **frequency generator**. The frequencies are set using a rotary knob. You can set the frequencies in the range of 0.1 up to 1000 Hz. The **harmonics** emitted by the **MEDISEND®super devices reach up to the MHz range**. Thus the devices generate all **RIFE and CLARK frequencies** up to 10 MHz.

← Frequencies

Furthermore, you have the choice between **two frequency sweeps/scans**: 1000 to 1 Hz and 100 to 1 Hz. In these cases, the device runs through all frequencies within the selected bandwidth within approx. eight seconds. The frequency sweep starts at 1000 or 100 Hz, passes through all frequencies down to 1 Hz and then starts again from the beginning. Thus the body is offered a wide range of frequencies to **stimulate the regulation**. The frequency scans are often chosen to **support detox procedures** or to **start a series of applications**.

You can use the provided **list that shows you a lot of experience data** to select frequencies. For complex questions, it is useful if you support the selection of the frequencies by a **test procedure**, such as testing with a tensor, kinesiology, EAV or RAC.

← Selection of frequencies

The AMS regularly offers a **tensor seminar** once or twice a year where you can learn how to use the tensor. The seminar takes place in the South of Germany and is held in German language. Dates and more information can be found on our website **www.magnetotherapy.de** in the menu item **Seminars**.

In addition to the different adjustable frequencies (among others it is always possible to set **7.8 Hz, the main value of the Schumann frequency spectrum**), the **Geomagnetic frequencies** and the **Solar frequencies** are always also generated by the **MEDISEND®super devices** - **regardless** of the frequency you choose for the application.

← Environmental signals

Schumann, Geomagnetic and Solar frequencies are our natural **environmental signals**. A detailed description for these signals can be found on page 4/5 in this catalog or on our website **www.magnetotherapy.de** in the menu item **Basics of the magnetic field therapy**.

The MAGNETO-loop emits the pulsating magnetic field

## Transfer of bioinformation - analog and digital

There are **suitable accessories** for the **MEDISEND®super devices**, some of which are included in the scope of delivery. You can also purchase some other accessories **optionally**.

→ **MAGNETO-loop** for transmitting the pulsating magnetic field (included in the scope of delivery):

In order to be able to apply the electromagnetic field, an applicator has to be connected to the device, e.g. the **MAGNETO-loop**. The electromagnetic field comes out of the MAGNETO-loop. For the application, it is placed **on or close to the body**.

The **physiological effective range** of the electromagnetic field emitted by the loop is up to 2 m / 6.6 feet in diameter. It is **neither visible nor audible**. Very sensitive people sometimes feel something - but that does not have to be.

Transfer of information →

A pulsating electromagnetic field has the ability to **transport and transmit information**. This is comparable to the radio waves coming from the television or the radio: Here, a transmission of picture and sound is transferred by a modulated carrier wave (e.g. FM frequencies). Within the sense of bioresonance according to Dr. W. Ludwig, the pulsating electromagnetic field is additionally used as a **carrier wave** for bioinformation. It is called transfer of **exogenous** (foreign to the body) or **endogenous** (body's own) bioinformation.

In order to use the magnetic field as a **carrier wave for bioresonance**, it is possible to connect a MEDICUP and the hand electrodes to the device.

MEDICUP for exogenous information →

→ **MEDICUP** for the transmission of exogenous information (optionally available):

To transfer exogenous information, place the medication (e.g. any homeopathic remedy) into the connected **MEDICUP**. As soon as you have started the application with the device, the electromagnetic field acts not only as an **application signal**, but also as a **carrier wave** for the information that is inside the MEDICUP. The transmission of information is **independent** of the frequency you choose: **Any frequency** is a carrier wave and can be used for **transmitting bioinformation**.

As with the selection of the frequency, it is also advisable to use a **suitable testing method** to choose the substrates that you want to transfer.

Hand electrodes for endogenous information →

→ **Hand electrodes** for the transmission of endogenous information (optionally available):

**Endogenous (body's own) information** can also be transmitted with the pulsating electromagnetic field by connecting hand electrodes to the device. Via the **symmetrical skin contact** (right and left half of the body), the endogenous bioinformation is tapped/scanned by the hand electrodes and returned to the body in the form of „**attention signals**“ in the sense of bioresonance.

The hand electrodes are used to **receive** the information of the complete body biofield. This received information is modulated onto the magnetic field emitted by the MAGNETO-loop and thus **returned to the body**.

The application of the pulsating electromagnetic field in **combination with endogenous and exogenous information** supports especially any **detox processes**.

## Digital transfer with the AMScomsystem - The optimal supplement to the MEDISEND®super C

With the **MEDISEND®super C**, it is possible to use not only analog but also **digitized substrates for the exogenous transmission** of information. For this purpose we developed the software **AMScomsystem** and digitized over 6,000 substrates (homeopathic remedies, Bach flowers, nosodes, phytotherapeutics, etc.). These digitized information we call **BIOWAVES**, which we have put together in eight different packages. You control your **MEDISEND®super C** with the **computer** and transfer the selected BIOWAVES during the application using the magnetic field.

### Please note:

It is **not** possible to retrofit the **MEDISEND®super** later with an interface for the computer connection. If you want to leave the option of using the computer open for the future, but do not want to buy it immediately, you should invest in the **MEDISEND®super C** to start with.

## Combination with small devices

Two of our handy **small devices** can be combined particularly well with the **MEDISEND®super devices**

### CEPES-Laser®Vario:

It is connected to the **MEDISEND®super/C** with its cable and is used simultaneously with the application of the electromagnetic field. The red-light laser emits a pulsating magnetic field at the frequency set at the **MEDISEND®super/C**, as well as all exo- and endogenous bioinformation provided by the MEDICUP and hand electrodes.

### METRONOM C:

One of our practical small devices. It has five programs and provides a storage space where you can save a BIOWAVE digital information with the **MEDISEND®super/C** in **combination with the AMScomsystem software**. During the usage of the **METRONOM C** device, the stored BIOWAVE can be patched in to each of the five programs. The information of the BIOWAVE is modulated on the emitted magnetic field and thus transferred by it. It is ideal for therapists as a loaner for patients.

**Good to know: If you buy a large and a small device together, you will receive a 10% discount on the small device.**

Learn more about the **AMScomsystem** (p. 24 ff.), **CEPES-Laser®Vario** (p. 40 ff.) and **METRONOM C** (p. 49) in this catalog or in the particular product brochures. You find a complete listing of all digitized BIOWAVES in our **BIOWAVE catalog**. Please email us to ask for the documents or visit our website for download: [info@ams-ag.de](mailto:info@ams-ag.de) / [www.magnetotherapy.de](http://www.magnetotherapy.de)

# MEDISEND®super/C

## Technical Data:

<b>Magnetic field frequencies:</b>	Band width 0.1 - 1000 Hz / two frequency sweeps/scans: 1000 - 1 Hz and 100 - 1 Hz
<b>Physiological effective range:</b>	up to 2 m / 6.6 feet in diameter
<b>Battery:</b>	built-in rechargeable battery
<b>Weight:</b>	1.5 kg / 3.3 pounds without applicators
<b>Size:</b>	26.5 x 19.0 x 10.6 cm / 10.4 x 7.5 x 1.8 inches
<b>Scope of delivery:</b>	<b>MEDISEND®super</b> or <b>MEDISEND®super C</b> , applicator (MAGNETO-loop), battery charger, manual <b>Only MEDISEND®super C:</b> two connecting cables for laptop and METRONOM C
<b>Not part of the scope of delivery:</b>	MEDICUP, hand electrodes, METRONOM C, CEPES-Laser®Vario, Laptop and AMScomsystem software. You can purchase these items <b>optionally</b> .
<b>Warranty:</b>	2 years
<b>Accessories (optional):</b>	
<b>MEDICUP:</b>	bipolar cup (height 7 cm / 2.8 inches, diameter 5.5 cm / 2.2 inches), connecting cables (18 cm / 7.1 inches)
<b>two hand electrodes:</b>	consisting of V2A steel (length 12 cm / 4.7 inches, diameter 3 cm / 1.2 inches), connecting cable (2 m / 6.6 feet)

## Bioinformative Medicine Experienced therapists take a stand

**Günther Heepen**

**Non-medical practitioner,  
D-96047 Bamberg/Germany,  
author of numerous books  
particularly on the subject of  
"Schuessler salts" published by  
„GU-Verlag“**

"For me a therapy method must be logical, practicable and above all successful - only then it satisfies the requirements of a complementary medicine practice. Dr. Ludwig's Bioinformative Therapy reconciles all these aspects. The CEPES-Softlaser® (for me the engineering marvel of natural healing), the WAVE TRANSFER for transmitting therapy information or the tried-and-tested MEDISEND®super - I couldn't do without any of these, including the small frequency-therapy devices, in my practice. After over 20 years of experience, natural healing in the sense of information medicine is especially enjoyable for me. It gives me the opportunity to be creative and it is exciting with every new challenge."

**Dr. med. Kai Lühr**

**D-50672 Cologne/Germany,  
private practice in general me-  
dicine & natural healing with a  
highly diverse range of services**

"Since 1998 I have been working with Dr. Ludwig's bioinformative devices. If someone had told me back then that I would be using these devices with conviction on virtually every patient, I wouldn't have believed them. By now I cannot imagine providing for example neural therapy for acute or chronic back complaints without following it up with magneto-resonance therapy. Whether it be treatments of allergies, drainage to get rid of heavy-metal accumulation, chronic infection therapy or even antidepressive treatment - successful results and stimulation of self-healing processes are quickly achieved due to the combination with bioinformative treatment and methods."

**Prof. Dr. med. dent.  
Werner Becker**

**D-50735 Köln, President  
of the BNZ (Association of  
Natural Healing Dentists in  
Germany)**

"I greatly admire Dr. Ludwig, as a scientist and practitioner. His Bioinformative Medicine has proved to be the ideal method in my practice."

A "crumb" of drilled amalgam is used to produce a nosode with the WAVE TRANSFER that can be given to the patient in drop form. Detoxification / drainage is one of the absolute strengths of Bioinformative Medicine. Therapy is only possible when the regulation capability is reestablished.

Again and again I find that a sustained change in the regulation behavior is only possible when the matrix is stimulated with external impulses. Here magnetic fields in the frequency range of 1 Hz - 1000 Hz have a maximum effect."

**Jean-claude Alix**

**Non-medical practitioner,  
Buchweizenberg Natural  
Healing Center, D-42699  
Solingen/Germany, author of  
successful books, including  
the titles: „Es geht um... eine  
Zukunft ohne Krebs (future  
without cancer/ Ihren Darm  
(your bowels)/ Ihr Blut (your  
blood)/ Ihre Knochen (your  
bones)/ Ihr Leben (your life)“  
(published by Spurbuch-Verlag)**

"Since December 2002 we have been offering Dr. Ludwig's magnetotherapy at the Buchweizenberg Natural Healing Center. Already many years before then I had more or less intensively looked into the subject of magnetotherapy."

Searching for a device which would come up to my high therapeutic standards and expectations led me to Dr. Ludwig and his pioneering approach of amazingly effective information therapy."

This must be called a further development of bioresonance therapy with greatly extended possibilities, because additionally the vibrations or information of endogenous nosodes (for example own urine, dry skin flakes, lachrymal fluid) and of drugs (for example lymph, immune or skin function preparations) can be given to the body.

In practice the following proved to be the case within a very short period of time:

The therapy with the MEDISEND®super III device is perceived by many patients to be so beneficial and helpful that they mention its use specifically and place special emphasis on its use. Praise and thanks to Dr. Ludwig."

**Dr. med. Ulrich Gläser**  
D-04109 Leipzig/Germany,  
Director of the "zengamed"  
Holistic Medicine Center

"After I had heard Dr. Ludwig's lecture on Bioinformative Medicine at an acupuncture conference in the year 1999, I started - full of curiosity - with my first "Ludwig device", the CEPES-Laser®.

After only a short time the CEPES-Laser® became an indispensable working instrument in my daily practice. This was gradually followed by the full range of small devices up to the larger devices such as WAVE TRANSFER and MEDISEND®super III. And everything works brilliantly.

The strength of the AMS devices is their robustness and their universal combinability with all the natural-healing methods I use, such as for example acupuncture and psychokinesiology. The AMS devices prove to me every day that Dr. Ludwig's brilliant theory works successfully in practice. I am a grateful user of AMS devices.

By the way: As well as providing therapy to patients, they have become valuable helpers in maintaining my own health."

**Stephan Schönenberger**

**Pharmacist, Homeopath**  
Kolin Pharmacy, CH-6300 Zug

The MEDISEND®, or the "Little Ludwig", is the ideal small device for everyone. We recommend this highly successful device for example to use for electrosensitivity and sleeping disorder. In our pharmacy we

recommend the "Little Ludwig" to every interested customer as the "ideal traveling companion".

The MEDICUR®pro is a practical device for pain treatment - and fits in any pocket. It is for every therapist the ideal small device for additional "home treatment".

Note:

A randomized, double-blind, placebo-controlled study that was made with the MEDICUR® at King's College Hospital in London could prove a highly significant effect and pain relief and with the frequency 7,8 Hz on knee arthrosis. If you are interested you can ask us for the study.

**Dr. med. Ulrike Heller**

**Doctor of ENT medicine / natural healing, D-72070 Tübingen/ Germany**

"Since 1998 I have been treating numerous patients with the CEPES-Laser® in my practice. Now I couldn't do without it. I have often been able

to drastically improve the self regulation processes within a few minutes with the CEPES-Laser®. The treatment is painless and has no side effects. The CEPES-Laser® has a very versatile usability - among other things I use it to eliminate interferences due to tooth and scar problems."

# WAVE TRANSFER/C

copy and store bioinformation

Are you looking for a device with which you can **copy information and save it analogously or digitally** on a medium? Then you are on the right page.

## Why duplicate substrates?

It is known that by law more and more homeopathic remedies disappear from the market or have already disappeared.

Already in 1997 the well-known doctor and scientist Dr. Dietrich Klinghard contacted Dr. Ludwig, to draw attention to this problem - and 1998 the first **WAVE TRANSFER** device was born and came to market.

By means of **analog and digital storage** the **WAVE TRANSFER devices** represent a possible way to remain independent of this development. They make it possible to secure the benefits of these resources for the future.

## Information transfer to a carrier medium

With the **WAVE TRANSFER devices** you can **transfer and duplicate frequency spectra of bioinformation** to a carrier medium.

Original and carrier medium →

You have an **original**, e.g. a homeopathic remedy that you want to transfer to a **carrier medium**, which can be an ampule of physiologic salt solution.

You need to have one input and one output cup, the MEDICUP, connected to the **WAVE TRANSFER** or the **WAVE TRANSFER C**.

copy from input to output cup →

Place the original substrate into the **input MEDICUP** and the carrier medium into the **output MEDICUP** - in our example the ampule of salt solution.

Information of any substance is transferable →

The switched on **WAVE TRANSFER** now transfers the information of the original data to the physiologic salt solution within **15 seconds**. Thus you can **transfer the information of any substance** to a carrier medium.

identical or reversed image →

With the **WAVE TRANSFER devices**, the information of the original substrate can be transferred and stored on the carrier medium in two ways:

- **in phase:** in an **identical 1:1 copy**
- **inverted:** in a **reversed image copy**

no potentiation possible →

### Important to know:

There is **no way to potentize** the substrate in the homoeopathic sense. The **WAVE TRANSFER devices** are **solely able to copy and store**. In order to potentize a substrate, deluting and shaking the substance are necessary.

Digital and analog transfer with WAVE TRANSFER C →

With the **WAVE TRANSFER C** in combination with the **AMScansystem software**, you can also **digitize** and save information as a data file, as well as **analogize** digital substances and transfer them to a carrier medium. Read more about this on the following pages.

## Copy information fast and easily

### Carrier media

The carrier medium **does not necessarily have to be physiological salt solution**, although it is particularly suitable for this purpose because of its composition.

Further possible carrier media can be:

- clear (spring-)water
- already prefabricated drops with, for example, a homeopathic mixture (e.g. Metavirulent®)

← NaCl  
and H<sub>2</sub>O

Since it is **the water** that with its characteristics has the ability to **absorb and store the information**, plain globules are not very suitable as carrier medium. Although globules also contain the smallest amount of water which can absorb the information, you should always stick to an **aqueous liquid as a carrier medium**.

It is not only possible to transfer the information from **individual substrates**. Of course it is also possible to transfer frequency spectra from **several substrates** simultaneously or one by one to a single carrier medium. This allows you to put together your own **individually composed** product as a **complex remedy**.

← complex  
remedies

### WAVE TRANSFER and WAVE TRANSFER C

We offer **two different WAVE TRANSFER devices** - the **WAVE TRANSFER** and the **WAVE TRANSFER C**. The „C“ stands for „**Communication**“ or simply „**Computer**“.

The **WAVE TRANSFER** duplicates the information **solely the analog way**. This means that, as described above, it creates a **copy of the original** from the input MEDICUP to a **carrier medium** in the output MEDICUP.

Of course the **WAVE TRANSFER C** can create an analog copy also. **Additionally** it can - connected to a computer with the **AMScomsystem software** - instead of storing the information to an aqueous carrier medium, **convert the information** from the input MEDICUP into a data file and **stores it as a file on the computer**. This process is called **digitization**. The file that is created is called a BIOWAVE file, or simply a „**BIOWAVE**“.

← analog or  
digital

These stored **digital BIOWAVES** can be transferred with the **WAVE TRANSFER C** on an **analog carrier medium** such as physiological salt solution. This process is called **analogizing**.

### Use of digital substrates - with the WAVE TRANSFER C

In order to benefit with the **WAVE TRANSFER C** from a **large stock of digitized substrates (BIOWAVES)** and to be able to analogize and transfer them to a carrier medium, you have two possibilities:

- Digitization of your **own substrates** that are available to you
- Purchase one or more of our **BIOWAVE extension packages** (p. 29)

The AMS offers **eight different BIOWAVE extension packages**, which you can use with the **WAVE TRANSFER C** and the **AMScomsystem**.

← BIOWAVES

Learn more about the **AMScomsystem** from p. 24. You find a complete listing of all digitized BIOWAVES in our **BIOWAVE catalog**. Please email us to ask for the documents or visit our website for download: [info@ams-ag.de](mailto:info@ams-ag.de) / [www.magnetotherapy.de](http://www.magnetotherapy.de)

## WAVE TRANSFER devices

### The WAVE TRANSFER...

#### WAVE TRANSFER

- **is handy and very easy to use.** Put the substrate that you want to duplicate into the input MEDICUP. In the output MEDICUP place an ampule with aqueous solution and start the transfer.
- transfers and stores the information onto the carrier solution within **15 seconds**.
- can transfer the frequency spectra of one or more ampules / substrates simultaneously or successively to a single carrier medium. As a result, you receive **individual or complex remedies** depending on your needs.
- can transfer the information to the carrier medium in **two different ways**:
  - **in phase**: in an identical 1:1 copy
  - **inverse**: in a reversed image copy
- offers the possibility to **amplify** the signals for transmission in twelve steps.
- always generates and transmits the **Geomagnetic frequency spectrum of the der 64 trace elements**.

### The WAVE TRANSFER C...

#### WAVE TRANSFER C

- transfers and stores bioinformation **analogly and digitally** on carrier solutions or as a data file on the **PC using the AMScomsystem** (creating a **BIOWAVE**-file).
- creates digital files of bioinformation (**BIOWAVES**). These can be transferred to the pulsating magnetic field in combination with a **MEDISEND®super III** or a **MEDISEND®super C** for testing and application.
- can use the **AMScomsystem** to store both **individual and complex remedies** as a BIOWAVE file. The complex remedies are called „**Multiple BIOWAVES**“.
- can **analogize** the digital BIOWAVES and transfer them to a carrier solution. This is possible in two different ways:
  - **in phase**: in an identical 1:1 copy
  - **inverse**: in a reversed image copy
- always generates and transmits the **Geomagnetic frequency spectrum of the der 64 trace elements**.
- The hand held device **METRONOM C** can be connected to the **WAVE TRANSFER C** in combination with the **AMScomsystem** in order to store a **BIOWAVE** on it. The stored BIOWAVE information can be patched in to the **pulsating magnetic field** that is generated by the **METRONOM C** device. Learn more about the **METRONOM C** on page 49 or on our website: [www.magnetotherapy.de](http://www.magnetotherapy.de)

## AMScomsystem - Digital usage of the WAVE TRANSFER C

In order to be able to use the entire range of functions of the **WAVE TRANSFER C** device, you need our **laptop with the AMScomsystem software**. This means that you not only can transfer information in an analog way from cup to cup but also **digitize and store** your own substrates as data files on the computer, as well as **analogize** all digitized substrates again and transfer them to a carrier medium. We have digitized **more than 6,000 substrates** (homeopathic remedies, Bach flowers, nosodes, phytotherapeutics, etc.). These digitized substrates are called BIOWAVES, which we have put together in eight different packages. These BIOWAVE packages you can purchase separately (p. 29).

### Please note:

For the **digitization** of substrates and the use of the BIOWAVES with the laptop and the **AMScomsystem software**, you can only use the **WAVE TRANSFER C**. The smaller **WAVE TRANSFER** can solely be used for **analog transmission**.

## Combination with the METRONOM C

One of our practical small devices. It has five programs and provides a storage space where you can save a BIOWAVE digital information with the **WAVE TRANSFER C** in combination with the **AMScomsystem software**. During the usage of the **METRONOM C** device, the stored BIOWAVE can be patched in to each of the five programs. The information of the BIOWAVE is modulated on the emitted magnetic field and thus transferred by it. It is ideal for therapists as a loaner for patients.

## The MEDICUP

You can connect to each of the **WAVE TRANSFER devices** two **MEDICUPs**: One to the input and one to the output. The cups are available in two different sizes (height 7 cm / 2.8 inches and 14 cm / 5.5 inches, diameter 5.5 cm / 2.2 inches each).

The **MEDICUP** consists of two separate cup halves made of a special aluminum alloy. Due to its construction, it catches only about 1% electrosmog - thus the transfer of the information from the original to the carrier medium is almost free of electrosmog.

### Included in the scope of delivery:

WAVE TRANSFER: 2x MEDICUP small  
WAVE TRANSFER C: 1x MEDICUP small

## WAVE TRANSFER

### Technical Data:

<b>Size:</b>	15.5 x 9.5 x 6.5 cm / 6.1 x 3.7 x 2.6 inches
<b>Weight:</b>	350 g / 12.3 ounces
<b>Batteries:</b>	four batteries, type AA
<b>Transmitted frequency range:</b>	1 Hz to approx. 200.000 Hz
<b>Additional settings:</b>	Intensifying from 1-12, signal modulation „in phase/identical“ or „invers“
<b>Scope of delivery:</b>	<b>WAVE TRANSFER</b> incl. four batteries, type AA with two small MEDICUPs (7 cm / 2.8 inches), diameter 5.5 cm / 2.2 inches, connecting cable for in- and output, connection cables for the MEDICUPs, manual
<b>Warranty:</b>	2 years
<b>Order No.:</b>	208

## WAVE TRANSFER C

### Technical Data:

<b>Size:</b>	26.5 x 19.0 x 10.6 cm / 10.4 x 7.5 x 4.2 inches
<b>Weight:</b>	1.2 kg / 2.9 pound
<b>Batteries:</b>	built-in rechargeable battery
<b>Transmitted frequency range:</b>	1 Hz to approx. 200.000 Hz (analog)
<b>Additional settings:</b>	Intensifying from 1-12, signal modulation „in phase/identical“ or „invers“
<b>Scope of delivery:</b>	<b>WAVE TRANSFER C</b> with one small MEDICUP (7 cm / 2.8 inches), diameter 5.5 cm / 2.2 inches, connecting cable for in- and output, charger, USB connecting cable, PD connecting cable, manual
<b>Not part of the scope of delivery:</b>	Second MEDICUP, Laptop with AMScomsystem and METRONOM C software. You can purchase these items <b>optionally</b> .
<b>Warranty:</b>	2 years
<b>Order No.:</b>	210

To see the current USD price and place your order please check our website and online shop:  
[www.magnetotherapy.de](http://www.magnetotherapy.de)

# AMScomsystem/ BIOWAVES

## Digital testing and application

With our control software **AMScomsystem** you can use **digital bioinformation**.

### Examples for bioinformation:

- Homeopathic remedies
- Bach flowers, phytotherapeutics
- Schuessler salts
- Nosodes
- Organ preparations
- Environmental toxins and many substrates more

If these bioinformation are stored in a digital form as a file in the **AMScomsystem**, we call them **BIOWAVES**. We offer you more than 6,000 already digitized media bundled in eight different BIOWAVE packages (p. 29).

### MEDISEND®super III / C

### WAVE TRANSFER C

### METRONOM C

## The C-Generation

In order to be able to use the **BIOWAVES**, a **laptop with the AMScomsystem** must be connected to one of our devices of the „C-Generation“. The C-Generation includes:

- **MEDISEND®super III and MEDISEND®super C**
- **WAVE TRANSFER C**
- **METRONOM C** (in combination with a large device of the C-Generation)

The various devices serve different purposes as soon as they are connected to the **laptop and the AMScomsystem**:

### 1. MEDISEND®super III / MEDISEND®super C

With these two large devices, you can use the **AMScomsystem** to **support the testing of suitable BIOWAVES** and using them during an **application**. The selected BIOWAVES are transmitted with the **pulsating magnetic field** emitted by the devices.

### 2. WAVE TRANSFER C

With the WAVE TRANSFER C **any substrate can be digitized**, i.e. turned into a **BIOWAVE** and saved as a file in the **AMScomsystem**. If required, each BIOWAVE can be **analogized**, which means reconverted and transferred and stored to an aqueous carrier solution. The WAVE TRANSFER C is **not** a therapy device.

### 3. METRONOM C

Our **hand-held device** METRONOM C has a **storage space for a BIOWAVE file**. It is possible to use this storage space to save the information of a **single or a complex remedy**. Therefore the METRONOM C has to be **connected to a large device with the AMScomsystem**. The stored digital information can be patched in to the **pulsating electromagnetic field** that is generated by the METRONOM C with each of its five programs. .

# AMScomsystem

## Use of digital bioinformation

### Functional areas

The AMScomsystem comprises three cross-linked functional areas:

#### 1. Personal data modul:

- Documentation and management of personal and treatment data.

#### 2. Device modul:

- Control of device settings and storage of treatment templates and programs. Also support for testing selected BIOWAVES.

#### 3. BIOWAVE modul:

- Digitization (only possible with the **WAVE TRANSFER C**), storage and management of bioinformation as single and complex remedies in the form of so-called BIOWAVES.

### BIOWAVES

**BIOWAVES** - this is what we call all **information from substrates** that have been digitized by using our **WAVE TRANSFER C** device. These can be homeopathic remedies, Bach flowers, nosodes, Schüssler salts etc.

Every human being, every plant, every remedy constantly gives its own characteristic vibration spectrum to its surrounding. All these oscillations / frequencies are measurable and thus also detectable.

Due to modern microelectronics, it is possible to **capture and digitize** frequencies of substrates (e.g., homeopathic remedies, nosodes, etc.) with the **WAVE TRANSFER C** and store them as a so-called **BIOWAVE** on a hard disk.

Our body is not able to understand this information in digital form. For this reason, this digital bioinformation has to be retransformed into an **analogous** form, which is **intelligible to the organism**.

For this purpose it is possible to use the **MEDISEND®super III / C** or the hand held device **METRONOM C** to modulate the information onto a pulsating electromagnetic field and transfer it to humans or animals.

Another possibility is to transfer the digital information to an aqueous solution using the **WAVE TRANSFER C** and thus retransform it to an analog information.

It is well known that more and more homeopathic remedies disappear from the market due to by law formalities. **Digitization** is a possible way to secure the benefits of these remedies for the future.

You find a **complete listing** of all digitized BIOWAVES in our **BIOWAVE catalog**. Please email us to ask for the documents or visit our website for download: **info@ams-ag.de / www.magnetotherapy.de**

← digital  
information

Here you can find us on the internet: **www.magnetotherapy.de / info@ams-ag.de**

Order give us a call: **+49 (0) 79 34 / 99 34 89 - 0**

On the following page you will find some information about the **usage of the AMScomsystem** with the various possible devices. Due to the limited space available in a catalog, the statements are brief and clear. You can find out more about the respective devices described on our **website**. In addition, you will find some **screenshots of the AMScomsystem software** for better visualization. Of course, you can also **call us** to ask your questions personally. We are happy to help.

← usage

## Possibilities of application with the AMScomsystem

In order to understand the use of the **AMScomsystem** software with the available devices, it is useful to first familiarize yourself with the application of the respective devices (**MEDISEND®super III / MEDISEND®super C**, **WAVE TRANSFER C** and **METRONOM C**). For this purpose, please refer to the corresponding individual brochures or check out our website: [www.magnetotherapy.de](http://www.magnetotherapy.de)

### AMScomsystem with MEDISEND®super III / MEDISEND®super C

If the laptop with the **AMScomsystem** is connected to the **MEDISEND®super III / MEDISEND®super C**, it can support you in the **testing and application of the BIOWAVES**.

Instead of an analog transfer of substrates using the MEDICUP, you can use **digitized information - BIOWAVES** - with the **AMScomsystem**. To determine suitable BIOWAVES with a test of your choice, select the information to be tested in the corresponding mask from your BIOWAVE stock. The selected BIOWAVES are then transmitted successively with the **pulsating magnetic field** of the connected device to the person to be tested. Thus they can be checked for compatibility with the application. For this purpose, you can use a **test method** which suits you best - this can be testing with a tensor, kinesiology, EAV, RAC and more. With the included **footswitch**, you can **mark the substrates** according to the test result without having to use your hands for the mouse.

After testing, the positively tested and marked substrates are automatically transferred to the application module and thus transmitted with the magnetic field frequency selected by you. You can also start an application with an electromagnetic field and BIOWAVES even **without previous test**.

It is possible to **save tests, to recall and to re-evaluate** them in a next session. You can also create **test templates**, which can be selected with a mouse click to **quickly start the test**.

In the **personal data module**, you fill in your patient data so that each application can be saved and documented **individually**. You can also **print** the tested BIOWAVES.

### AMScomsystem with METRONOM C

The **hand held device METRONOM C** has a **storage space** where **digital bioinformation (BIOWAVES)** can be stored as **single or complex remedies**.

Thus the METRONOM C can be used for **individual application at home**. It has **five selectable programs** of different magnetic field frequencies. With **each of the programs**, the **stored BIOWAVE** can be **activated** as an exogenous bioinformation for transmission.

Some therapists using a large device with the **AMScomsystem** for their practice, have one or more METRONOM C devices that they **rent or lend to their patients for home use**.

A connection of the METRONOM C device to the computer with the **AMScomsystem** software **without** a MEDISEND®super III / MEDISEND®super C or a WAVE TRANSFER C is **not** possible.

### AMScomsystem with WAVE TRANSFER C

If you want to **transfer** the digitized BIOWAVES onto a **carrier medium**, e.g. **physiological salt solution** or another aqueous solution, you will need the **WAVE TRANSFER C** in combination with the **AMScomsystem**.

With this device, it is also possible to **convert** all analog substrates and remedies into **digital files**. So you are able to create your own **BIOWAVES**.

The WAVE TRANSFER C is **not a therapy device**. It **does not generate a pulsating magnetic field**, but is **exclusively** designed to convert bioinformation such as homeopathic remedies, Bach flowers, Schuessler salts, nosodes, phytotherapeutics, etc. into digital data or transfer them to carrier media.

AMScomsystem with

## Note on the laptop for the AMScomsystem

The laptop is supplied by different manufacturers - so we are **not fixed on brand or model**. Our distributor looks for **certain components of the hardware**, which ensure a **smooth interaction** of the laptop with our large devices.

The computer-assisted handling of the BIOWAVES is highly computationally intensive and much more complex than it seems. Therefore the device is opened by our supplier in order to check the **quality of the installed components**. In addition, he examines the system **Laptop/AMScomsystem** with an external test by **preinstalling our software** and checking for **100% suitability** through various test runs.

Only after a successful examination the laptops are delivered to us. We pass them on to our customers - **without surcharge to the purchase price**.

The **AMScomsystem** software cannot be purchased without the **laptop**. We also recommend that our customers do not install additional programs on the computer with the AMScomsystem. The laptop should be used **solely to control our devices**. It is **not** possible to install the **AMScomsystem** on an Apple computer.

For training on the use of the software, any questions or problems, we can help you at any time with the **remote maintenance module** from our office.

## Devices for the AMScomsystem

### MEDISEND®super III / C:

Magnetic field devices for application in your practice.

#### MEDISEND®super III

#### MEDISEND®super C

### WAVE TRANSFER C:

Copy and save bioinformationen, analog und digital.

### METRONOM C:

Small hand held device for home use with storing space for BIOWAVES.

# AMScomsystem

## Technical data:

<b>Laptop:</b>	Laptop with Windows 10, 15.6 Zoll HD screen
<b>Size:</b>	depending on model approx. 26 x 38 cm / 10.2 x 15 inches
<b>Weight:</b>	depending on model approx. 2.3 kg / 5.1 pounds
<b>Battery:</b>	Rechargeable battery of laptop
<b>Scope of delivery:</b>	Laptop with Windows 10 and installed AMScomsystem, USB foot pedal and „Starter package“ (approx. 60 digitized BIOWAVES), manual
<b>Warranty:</b>	2 years
<b>Training:</b>	By purchasing the <b>AMScomsystem</b> with a corresponding large device, you will of course receive training on how to use the software.

We usually do this via telephone. At the same time we have remote access to your laptop. We will have already installed the required remote module on the computer.

This allows us to lead you through the application process on your own screen step by step.

## Order number: 902

To see the current USD price and place your order please check our website and online shop:

[www.magnetotherapy.de](http://www.magnetotherapy.de)

Learn more about the devices mentioned on page 8 ff., 18 ff and on page 49. A complete listing of all digitized BIOWAVES can be found in our **BIOWAVE catalog**. Please email us to ask for the documents or visit our website: [info@ams-ag.de](mailto:info@ams-ag.de) / [www.magnetotherapy.de](http://www.magnetotherapy.de)

## What are BIOWAVES?

BIOWAVES - this is what we call all information from substrates that have been digitized by using our **WAVE TRANSFER C** device. These can be homeopathic remedies, Bach flowers, nosodes, Schuessler salts etc.

But why is it possible to create and save such BIOWAVE files? What exactly are BIOWAVES?

Every human being, every plant, every remedy constantly gives its own characteristic vibration spectrum to its surrounding.

Everything oscillates - this is due to the construction of our matter. It is nothing else but „condensed“ energy.

Thus, for example, every human being constantly emits his individual oscillation spectrum in a wide frequency range. This especially shows in the infrared range (thermal radiation), but even in the X-ray range there is a steady radiation due to radioactive potassium ( $^{40}\text{K}$ ), which is naturally present in the body.

All these oscillations / frequencies are measurable and thus also detectable.

Due to modern microelectronics, it is possible to capture and digitize frequencies of substrates (e.g., homeopathic remedies, nosodes, etc.) and store it as a so-called BIOWAVE on a hard disk. (For details see the product description of the **WAVE TRANSFER C** and the **AMScomsystem**).

Our body is not able to understand this information in digital form. For this reason, this digital bioinformation has to be retransformed into an analogous form, which is intelligible to the organism.

For this purpose it is possible to use the **MEDISEND®super III** or the **MEDISEND®super C** to modulate the information onto a **pulsating electromagnetic field** and transfer it to humans or animals through appropriate applicators. This form of modulation can be compared with radio and television signals, which also transport information.

Another possibility is to transfer the digital information to an **aqueous solution** using the **WAVE TRANSFER C** and thus retransform it to an analog information.

It is well known that more and more homeopathic remedies disappear from the market due to by law formalities. Digitization is a possible way to secure the benefits of these remedies for the future.

Just imagine:

How much will be 6,000 testing remedy ampules?

You can copy and use our BIOWAVES over and over again!

To see the current USD prices and place your order please check our website and online shop:

[www.magnetotherapy.de](http://www.magnetotherapy.de)

**910 BIOWAVE Basis package - Mixture**

(over 300 BIOWAVE spectra in CD quality)

**Basis mixture of substrate oscillations of pathogens (bacteria, fungi, parasites, viruses and worms), contaminations, miasma, animal remedies and the whole set of Bach flower remedies.**

**950 Extension package IV**

(over 700 BIOWAVE spectra in CD quality)

**Substrate oscillations of homeopathic processed viruses, fungi and worms.**

**920 Extension package I**

(over 600 BIOWAVE spectra in CD quality)

**Mixture of substrate oscillations of homeopathic and herbal remedies, organ systems, gemstones and Schuessler salts.**

**960 Extension package V**

(over 500 BIOWAVE spectra in CD quality)

**Substrate oscillations of homeopathic processed environmental toxins.**

**930 Extension package II**

(over 200 BIOWAVE spectra in CD quality)

**Dental medical part with substrate oscillations of anatomical, material and medicamentous substances.**

**970 Extension package VI**

(over 1.000 BIOWAVE spectra in CD quality)

**Substrate oscillations of organ preparations.**

**940 Extension package III**

(over 1.000 BIOWAVE spectra in CD quality)

**Substrate oscillations of homeopathic processed bacteria.**

**980 Extension package VII**

(over 1.300 BIOWAVE spectra in CD quality)

**Substrate oscillations of specific nosodes.**

## Application and interaction of the C-Generation

The chart on the right side shows how all devices of the **C-Generation** (MEDISEND®super III / MEDISEND®super C, WAVE TRANSFER C und METRONOM C) can be used altogether and in combination for application and therapy.

### MEDISEND®super III / MEDISEND®super C

For doing a therapy with a pulsating electromagnetic field with the transfer of digitalized bioinformation either the **MEDISEND®super III** or **MEDISEND®super C** has to be connected to a laptop and the software **AMScomsystem**.

This way the digitalized bioinformation (**BIOWAVES**) can be transferred and modulated onto the pulsating electromagnetic field of the devices to be tested and applied. You get more information for the **testing process** in the box on the right side of the page.

### WAVE TRANSFER C

Also the **WAVE TRANSFER C** can be connected to the laptop and the **AMScomsystem** software. Thus you can store analog substrates (e.g. homeopathic remedies, Bach flowers, nosodes, Schuessler salts) in a digitized form in the software. You can store the information (**BIOWAVE**) as a single substance or as a complex remedy composed of more than one substance. Now it is possible at any time to analogize the digital **BIOWAVE** file and transfer it on a watery carrier medium. As a matter of course with the **WAVE TRANSFER C** you can also transfer directly from an analog medium on a carrier medium without having to digitize it before.

### METRONOM C

With the **MEDISEND®super III / MEDISEND®super C** as well as with the **WAVE TRANSFER C** in combination with the software **AMScomsystem** you can transfer digitized information (**BIOWAVES**) in form of single or complex remedies on the storage space of the portable hand-held device **METRONOM C**. It has proven to be a very handy and practical device for the personal use at home.

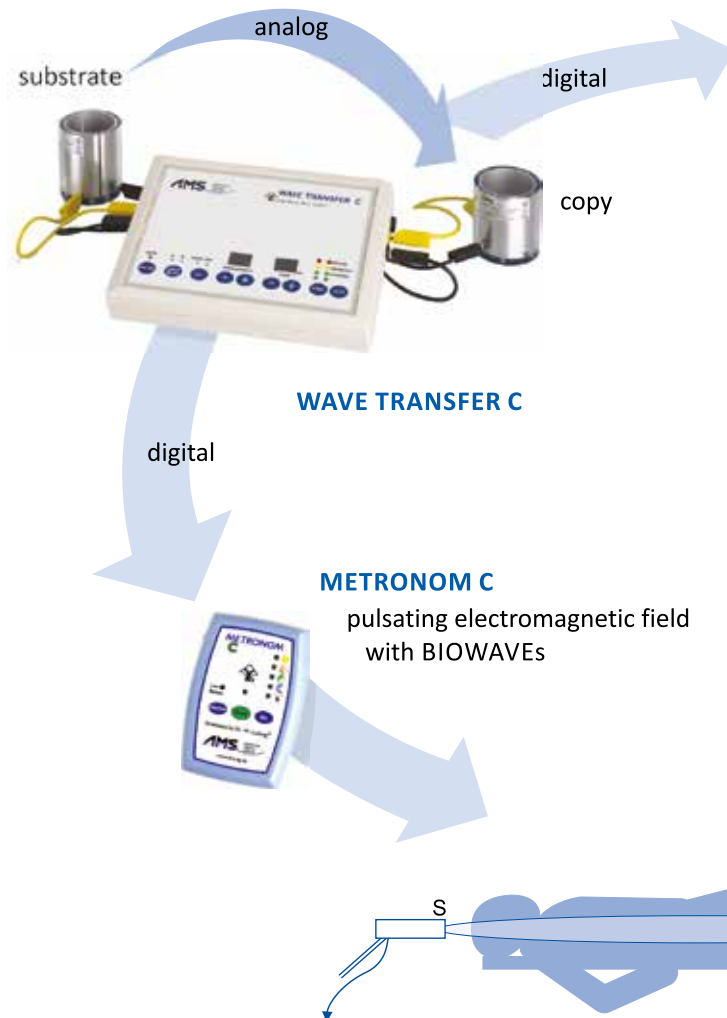

You find more information to every device on the particular descriptions in this catalog.

## The devices of the C-Generation

In order to be able to use the **BIOWAVES** (digitized substrates), a **laptop with the AMScomsystem** has to be connected to one of our „C-Generation“ devices.

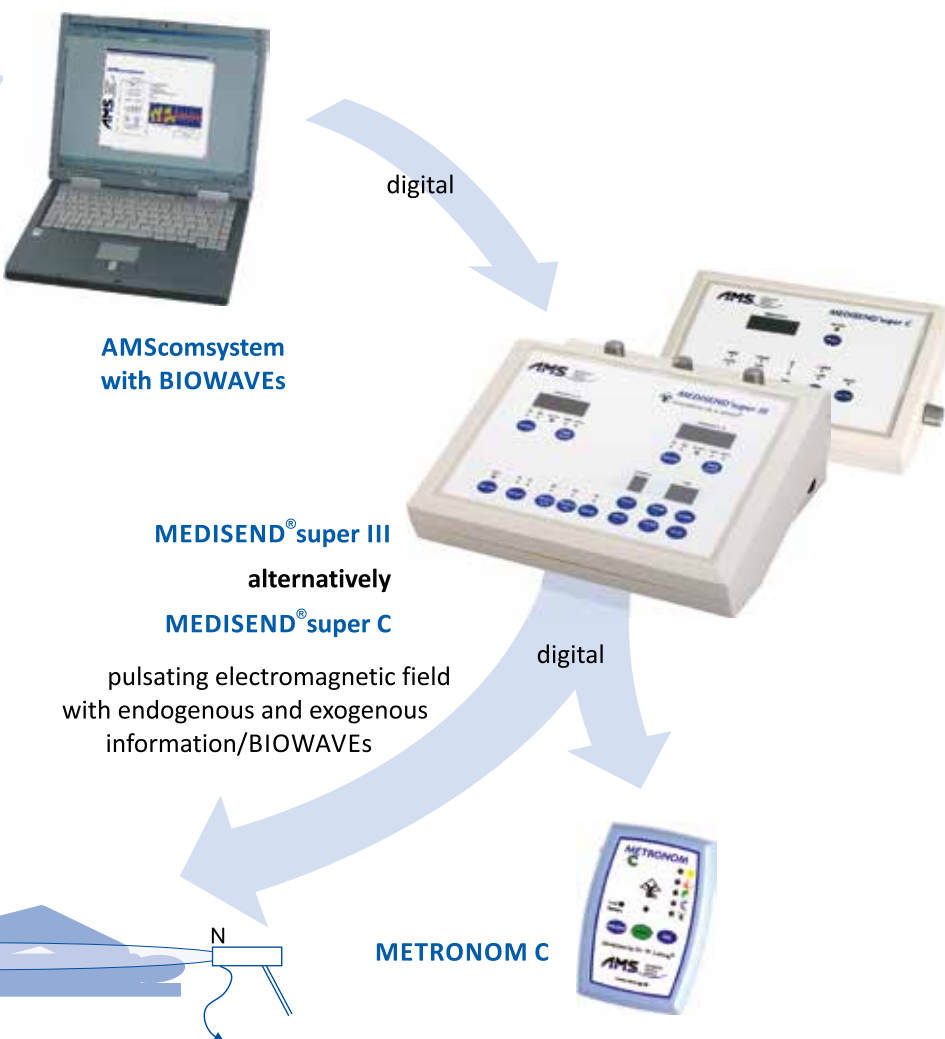

The C-Generation includes:

- **MEDISEND®super III** and **MEDISEND®super C** (p. 10 ff.)
- **WAVE TRANSFER C** (p. 20 ff.)
- **METRONOM C** (in combination with a large device) (p. 49)

## Use of the BIOWAVE files

The various devices fulfill different purposes as soon as they are connected to the **laptop with the AMScomsystem**. Read more about the **AMScomsystem and the BIOWAVES** on page 24 ff.

## How do I test?

In order to test the **digital** substrates (**BIOWAVES**) for their suitability for the application, they are modulated onto the pulsating electromagnetic field of the **MEDISEND®super III** or **MEDISEND®super C** and hence transferred to the person to be tested.

As a matter of course an **analog test** is also possible. In this case you simply put the remedies in ampules or similar into the connected **MEDICUP**.

In case of a digital test (in conjunction with the **AMScomsystem**) you choose the substances you want to test in your computer from the software.

The chosen substances will now be modulated onto the pulsating electromagnetic field generated by the connected **MEDISEND®super III/ MEDISEND®super C** and hence transferred to the person to be tested. The most established testing frequency is the Schumann Frequency of **7.8 Hz**.

The regulative reactions will now be tested with a **bioenergetic testing method** (e.g. kinesiology / tensor / RAC / EAV or similar) to find out which of the substances is suitable for the application.

The positively tested substances and remedies can then be used for the therapy as single or complex remedies with the connected **MEDISEND®super III/ MEDISEND®super C**.

Furthermore, you have the option to store the tested remedies as a **BIOWAVE** on the small **METRONOM C**, for homeuse.

Now I would like to purchase!

But what do I need for Bioinformative Medicine in my practice?

### Suggestion 1: Basic model

I am **not interested in the use of BIOWAVES** and therefore I **do not** need the interface for the PC with the AMS-comsystem: All you need is the **MEDISEND®super**. Important: It is **not** possible to upgrade and refit the **MEDISEND®super** later on.

**MEDISEND®super**  
Control unit incl.  
**MAGNETO-loop**

#### MEDICUP

Exogenous information transmission  
(e.g., homeopathic remedies,  
Bach Flowers, phytotherapeutics, etc.)

#### One pair of hand electrodes

Endogenous information transmission  
(you can modulate unspecifically the  
complete natural frequency spectrum  
of the body as bioinformation onto the  
pulsating electromagnetic field)

### Suggestion 2: Ready for the future

I would like to use the laptop with the AMScomsystem and the BIOWAVES **in the future**, but it will purchase it later: You buy for now the **MEDISEND®super C** with PC interface without software and BIOWAVES. You can buy it later.

**MEDISEND®super C**  
Control unit incl. **MAGNETO-loop**  
and USB-interface for computer connection

#### MEDICUP

Exogenous information transmission  
(e.g., homeopathic remedies,  
Bach Flowers, phytotherapeutics, etc.)

#### One pair of hand electrodes

Endogenous information transmission  
(you can modulate unspecifically the  
complete natural frequency spectrum  
of the body as bioinformation onto the  
pulsating electromagnetic field)

Optionally available: shock-proof **aluminum case** especially suitable if you are out for traveling - see p. 59

### Suggestion 3: complete system with AMScomsystem

I want to use the device with the laptop with the **AMScomsystem** right away:

#### MEDISEND®super C

Control unit incl.  
**MAGNETO-loop**  
and USB-interface  
for computer connection  
incl. laptop

#### MEDICUP

Exogenous information  
transmission

#### One pair of hand electrodes

Endogenous information  
transmission

#### Laptop with Windows 10°

**AMScomsystem** - already installed  
(communication- and controlsoftware)  
incl. foot pedal for easy testing

### Suggestion 4: complete system with AMScomsystem

I would like the **best device** that the AMS has to offer - including laptop and **AMScomsystem**:

#### MEDISEND®super III

Control unit incl.  
**directional inductors**  
flexible **MAGNETO-ring**  
and laptop

#### MEDICUP

Exogenous information  
transmission

#### One pair of hand electrodes

Endogenous information  
transmission

#### Laptop with Windows 10°

**AMScomsystem** - already installed  
(communication- and controlsoftware)  
incl. foot pedal for easy testing

Of course, we will **install the software** and **import your chosen BIOWAVE files** onto the laptop.

With your purchase of the AMScomsystem you get the „starter package“ with **60 BIOWAVES**, consisting of substrate oscillations of food and food additives **free of charge**.

# COLOR-Punctur

## colors and magnetic field

The **COLOR-Punctur** is a very special magnetic field device - it combines its pulsating electro-magnetic field with the **light of 12 selected colors**.

**Thus, you can combine proven methods of natural medicine:**

- Acupuncture
- Color-light-therapy
- Pulsating electromagnetic field
- Transfer of exogenous and endogenous bioinformation

For this purpose, the applicator **MAGNETO-stylus** is attached to the **COLOR-Punctur**. It looks like a pen and emits from its tip the light in the **selected color** as well as the **pulsating magnetic field in the corresponding frequency**.

The **MAGNETO-stylus** fulfills **different functions**:

- Output of the light in the selected color and the corresponding magnetic field frequency
- Detector for acupuncture points
- Measurement function following the electroacupuncture according to Dr. Voll (EAV)

versatile  
application →

### The COLOR-Punctur...

combines **proven methods of regulatory medicine** - color light, acupuncture, pulsating magnetic field and - with the help of connected hand electrodes and MEDICUP - transmission of endogenous and exogenous bioinformation (e.g. homeopathic remedies, Bach flower, nosodes, etc.)

unlocks regulatory  
blockades →

enhances any **holistic therapy concept**. It helps unlocking regulatory blockades and contributes to a stable energy balance.

point detection →

has a function to **detect acupuncture points**. Due to its ability to measure the skin resistance, the application starts as soon as you have found the acupuncture point with the stylus.

EAV functionality →

can also be used in the sense of an **electroacupuncture measurement (EAV)**. Optical and acoustic feedback support the measurement function.

## Colors and magnetic field - a powerful combination

No.	Color	Magnetic field frequency in Hz
1	red	19
2	red-orange	18
3	orange	17
4	yellow-orange	15
5	yellow	12,5
6	yellow-green	11,5
7	green	9,5
8	green-blue (turquoise)	8,5
9	blue	7,8
10	blue-violet (indigo)	6,5
11	violet	3,3
12	purple	30

### Choice of colors

By pressing the colored buttons on the device, you can select one of **twelve colors** that you want to use. Each color refers to a certain **magnetic field frequency**.

In the figure on the right you see the **color chart with the corresponding magnetic field frequencies**. The colors shown correspond approximately to the generated colors of the MAGNETO-stylus.

The most suitable color/frequency for the application can be **selected intuitively** or can be determined by testing with tensor, kinesiology or other **testing methods**.

← Usage

The AMS regularly offers a **tensor seminar** once or twice a year where you can learn how to use the tensor. The seminar takes place in the South of Germany and is held in German language. Dates and more information can be found on our website [www.magnetotherapy.de](http://www.magnetotherapy.de) in the menu item **Seminars**.

As soon as you have selected a color/magnetic field frequency, position the MAGNETO-stylus onto the desired **acupuncture point** where you want to apply the selected color with the magnetic field. This allows you to stimulate the acupuncture point without using needles.

color light  
and magnetic  
field

The **color-light intensity does not need to be strong** in order to reach the **response threshold** of the organism. A light beam directed at acupuncture points is passed through the run of the meridians (optical fibers). At the same time, the effect of the light is enhanced by the **pulsating magnetic field**. The electromagnetic field reaches a **depth of penetration** of approx. 20-30 cm / 7.9 – 11.8 inches.

← field

### Detecting and measuring acupuncture points

When you connect the included hand electrode to the **COLOR-Punctur** using the blue cable, you can also use the stylus to **detect acupuncture points**.

Using the **hand electrode as a counter pole**, you can measure with the stylus the **skin resistance**. You can set the device so that it **automatically starts** the emission of light and magnetic field as soon as you have found the corresponding acupuncture point with the stylus.

For this purpose, the **sensitivity** of the stylus can be individually adjusted - depending on the moisture of the skin surface, the stylus reacts slightly more or less sensitive to the acupuncture points.

Due to the point detection function, the device has yet also **other possibilities for usage**, for example doing an electroacupuncture measurement:

In order to be able to do an **electroacupuncture measurement**, the **COLOR-Punctur** has an integrated LED-display, which gives **visual and acoustic feedback** on the skin resistance of the measured acupuncture point. This makes it possible to check the energetic state before and after the application with an electroacupuncture measurement. Thus, in addition to other testing methods (tensor, kinesiology, etc.), there is another possibility to evaluate the energetic-physiological process.

← Measurement  
of the skin  
resistance

← Testing  
option

## Bioresonance - Transfer of Bioinformation

### Application

The **COLOR-Punctur** is **not** a medical device according to the Medical Devices Act (MPG). It can only have a positive influence on the **ability to regulate** and therefore does not serve to treat or alleviate diseases. The **COLOR-Punctur** can be used for **any type of acupuncture**. Whether head, mouth, hand, ear or body acupuncture, as well as on head zones, trigger points, chakras and scars. The **COLOR-Punctur** even can help to **overcome physical or emotional blockages**.

### Magnetic field for transfer of information

The **COLOR-Punctur** emits a **pulsating magnetic field** together with the **colored light** from the MAGNETO-stylus. A pulsating electromagnetic field has the ability to **transport and transmit information**. This is comparable to the radio waves coming from the television or the radio: Here, a transmission of picture and sound is transferred by a modulated carrier wave (e.g. FM frequencies). Within the sense of bioresonance according to Dr. W. Ludwig, the pulsating electromagnetic field is additionally used as a carrier wave for bioinformation. It is called **transfer of exogenous** (foreign to the body) or **endogenous** (body's own) bioinformation.

Bioresonance →

In order to use the magnetic field as a **carrier wave for bioresonance**, it is possible to connect a **MEDICUP** and the **hand electrodes** to the device.

Hand electrodes  
for endogenous  
information →

### Endogenous transfer of information with the hand electrodes

With two connected **hand electrodes** you can also transmit **endogenous (body's own) information** with the pulsating magnetic field. For this purpose, you need a **second hand electrode** in addition to the hand electrode that comes with the device.

Via the **symmetrical skin contact** (right and left half of the body), the endogenous bioinformation is tapped/ scanned by the hand electrodes and returned to the body in the form of „**attention signals**“ in the sense of bioresonance. These **attention signal** information are **modulated on the magnetic field of the stylus** and thus **returned to the body**. Through this attention signal the **regulation** can be supported in an individual way.

### Exogenous transfer of information with the MEDICUP

In order to use this ability of the magnetic field, a cup - the **MEDICUP** - is connected to the **COLOR-Punctur** device. The MEDICUP is divided into two halves so that each half is connected separately to the bipolar, symmetrical input. This ensures that the transmission is **free of electrosmog** and other information. Only the information that has been put in the cup is transferred.

MEDICUP for  
exogenous →  
information

To transfer **exogenous information**, place the medication (e.g. any homeopathic remedy) into the MEDICUP. Use an ampule or glass vial. As soon as you have set a color/frequency on the device and start the application, the electromagnetic field acts not only as an **application signal**, but also as a **carrier wave** for the information that is inside the MEDICUP.

The application of the pulsating electromagnetic field in **combination with endogenous and exogenous information** supports especially any **detox processes**. When you connect the hand electrodes and the MEDICUP, you work with **four application signals simultaneously**:

- **light** in the selected **color**
- **pulsating magnetic field** in the associated frequency
- **endogenous information** from the connected hand electrodes
- **exogenous information** of all substances in the MEDICUP

You can purchase the **second hand electrode** and the **MEDICUP** as an accessory **optionally**.

## Additional settings

### Modulation:

The signal of the magnetic field can additionally be modulated with 1.6 or 3.3 Hz. Both frequencies give the application a soothing character.

### Audio:

The **COLOR-Punctur** can give an acoustic feedback for the point search as soon as the point is found. This acoustic function can also be deactivated.

### Sensitivity:

The measuring sensitivity of the MAGNETO-stylus can be regulated to detect acupuncture points. This allows to compensate a very dry or moist skin surface for a consistent measurement.

### Time:

You can program the duration of the application.

## Dr. Ludwig's devices

All our devices - and so the **COLOR-Punctur** - are made according to the technology developed by Dr. Ludwig. It was important to him to develop devices that produce an artificial pulsating electromagnetic field that is as close as possible to the **natural field of the environment**. Therefore, the following statements apply to all devices that are (further) developed by Dr. Ludwig and in his institute:

- Generation or possible choice of the main value of the **Schumann frequency spectrum (7.8 Hz)**
- Generation of the **Geomagnetic frequencies** (64 trace elements)
- Generation of the **Solar frequencies** (to the sunlight corresponding FM frequencies)

Furthermore, all devices produce a signal whose pulse shape and magnetic field strength is optimally matched to the body.

For more information about Schumann, Geomagnetic and Solar frequencies as well as the quality characteristics of Dr. Ludwig's devices, please refer to page 4/5.

The devices that are developed by Dr. Ludwig are identified with the **arrow symbol**. The symbol stands for the creation of an electromagnetic biofield reflecting **undisturbed nature**.

# COLOR-Punctur

### Technical data:

#### Colors:

Twelve Colors (red, red-orange, orange, yellow-orange, yellow, yellow-green, green, green-blue (turquoise), blue, blue-violet (indigo), violet, purple)

Luminescence diodes produce almost the monochromatic light of the according color

#### Magnetic field frequencies:

3.3 / 6.5 / 7.8 / 8.5 / 9.5 / 11.5 / 12.5 / 15 / 17 / 18 / 19 / 30 Hz

#### Physiological range:

30 cm / 11.8 inches in diameter

#### Additional settings:

Sensitivity and time setting as well as the possibility of an amplitude and frequency modulation of the selected color with 1.6 Hz and 3.3 Hz

#### Interfaces:

six-pole output for connection of the MAGNETO-light stylus, a bipolar, symmetric input allows the connecting of a MEDICUP and hand electrodes

#### Battery:

built-in rechargeable battery

#### Size:

26.5 x 19 x 10.6 cm / 10.4 x 7.5 x 4.1 inches

#### Weight:

1,7 kg / 3.7 pounds

#### Scope of delivery:

**COLOR-Punctur**, MAGNETO-stylus, battery charger, one hand electrode (counter electrode for point localization), manual

#### Not part of the scope of delivery:

MEDICUP and second hand electrode. You can purchase these items **optionally**.

#### Warranty:

2 years

Order No. **COLOR-Punctur**: 203

Order No. **MEDICUP**: 501

Order No. **hand electrode**: 503

## CEPES-Laser®

our Bestseller

Application on :

- acupuncture points
- meridians
- skin areas
- chakras
- scars and more

### The only laser with pulsating electromagnetic field and substrate transients

Many know and love their CEPES-Laser® more than over 20 years – some practices, clinics, home remedy kits and handbags would be unimaginable without it.

The CEPES-Laser® is the established combination of:

- Red light
- Pulsating electromagnetic field
- Transfer of information/substrate transients

### The CEPES-Laser®...

Red laserlight →

**works with red laserlight.** You can adjust the beam's diameter with a slide switch to either approx. 0.7 or 0.2 cm (approx. 0.3 or 0.08 inches).

Magnetic field in three frequencies →

**generates a pulsating electromagnetic field.**

You can chose three different frequencies:

- 7.8 Hz – the well-tried and proven balancing principal value of the Schumann frequencies
- 33 Hz – for stimulating application respectively to tone an acupuncture point
- 3.0 Hz – for relaxing application respectively to sedate an acupuncture point

continuous or blinking Light →

**has two setting modes:**

- steady light with a continuous electromagnetic field
- light and magnetic field are interrupted by a frequency of 1.2 Hz (Nogier frequency)

Usage and Substrat transients →

**is applicable to** acupuncture points, meridians, skin areas, chakras, scars and more. It has also good effects for pain relive - simply work with the laser on the affected area. You can either work solely with one of the three frequencies or you use additionally the drill hole in the laser housing to insert an ampule for substrat transients. This way you can easily transfer the information of for example homeopathic remedy or other substrats. For transferring the information the main carrier is the the pulsating electromagnetic field.

38 with plug in tip →

**has a plug in tip** made of stainless steel for better positioning on acupuncture points. Moreover, it is useful to get through the fur of animals for treatment.

## Versatile usage

**Humans at any age as well as animals – they all response very well to the painless and hazard-free therapy with the softlaser.**

Did you know that the depth of penetration of the laser light is independent of the strength but only dependent of its wavelength?

This is why we decided also for the **CEPES-Laser®** to use only a small power of  $\leq 1$  mW.

your  
benefit

- no technical inspection needed
- no safety glasses necessary
- low asset costs compared to stronger lasers

Red laser light has a penetration depth of 2 cm (approx. 0.8 inches). The pulsating electromagnetic field that is generated at the same time even has a penetration depth of 30 cm (approx. 11.8 inches).

**Tips for application** see also on page 43.

**Dr. W. Ludwig's®** devices are identified with the **arrow symbol**. This symbol stands for generating an electromagnetic biofield as in undisturbed nature. The frequency spectrum of the 64 essential trace elements (Geomagnetic frequencies) is generated by a worldwide unique process.

**Buy the CEPES-Laser® without any risk!**

After purchasing you can return the device within 90 days with a money back guarantee. You will see this also on our invoice. If you return the device in perfect condition within the 90 days, we will give you a full refund (less shipping costs).

## Technical Data:

<b>Laserlight:</b>	fluctuating red wavelength $\lambda = 650$ nm $p \leq 1$ mW (Laser class 2 according to DIN EN 60825-1: 2008-05)
<b>Magnetic field frequencies:</b>	3.0 / 7.8 / 33 Hz
<b>Strength of magnetic field:</b>	0.9 $\mu$ Tesla
<b>Batteries:</b>	two batteries 1.5 V type AAA
<b>Weight:</b>	83 g (2.9 ounces)
<b>Size:</b>	1.8 x 3.4 x 15.7 cm (approx. 0.7 x 1.3 x 6.2 inches)
<b>Scope of delivery:</b>	<b>CEPES-Laser®</b> with batteries, plug in tip, case, three glass ampules (10 mm / 0.4 inches), manual
<b>Warranty:</b>	2 years

**NEW MODEL**

*Laser in combination with a large device*

## CEPES-Laser® Vario

**Laser with pulsating electromagnetic field  
and substrate transients for connection to a large device**

The **CEPES-Laser® Vario** is a **red light laser** which, in addition to its laser light, also emits a **pulsating magnetic field** during the application. It has basically the same characteristics as our stand-alone device **CEPES-Laser®**, but it is **only usable** if it is **connected by its cable to one of our large devices of the MEDISEND®super series**. Thus it **combines** the multifunctionality of the **AMS large devices** with the features of the **CEPES-Laser®**.

While the **stand-alone CEPES-Laser®** only has three different preset selectable magnetic field frequencies for its application, the **CEPES-Laser® Vario** **emits any frequency** that is set at the connected large device.

The **CEPES-Laser® Vario** is connected via interface to a **MEDISEND®super**, **MEDISEND®super C** or **MEDISEND®super III**. It **does not have its own batteries** (like the stand-alone **CEPES-Laser®** does) but it is powered by the large device it is connected to. Therefore it can **only be used in combination with a large device**.

Learn more about the **MEDISEND®super devices** and the stand-alone **CEPES-Laser®** on page 10 ff. and p. 38/39. If you have questions, please email us or visit our website: [info@ams-ag.de](mailto:info@ams-ag.de) / [www.magnetotherapy.de](http://www.magnetotherapy.de)

**Of course the CEPES-Laser® Vario unites the established combination of:**

- Red light
- Pulsating electromagnetic field
- Transfer of information/substrate transients

A laser that can be used on acupuncture points is known to many therapists. However, our **CEPES-Laser®** and the **CEPES-Laser® Vario** offer more than just laser light and include further applications than exclusively laser acupuncture.

It is helpful if you can locate and use **acupuncture points** or at least know the **course of the meridians**. However, **CEPES-Laser®** and **CEPES-Laser® Vario** are also applicable and useful without this knowledge. Another option is the use on whole **skin areas**, **trigger points**, **chakras**, **scars** and more.

*Laserlight and  
magnetic field  
in combination with  
an AMS large device*

- MEDISEND®super
- MEDISEND®super C
- MEDISEND®super III

*Versatile application*

CEPES-Laser®Vario connected to the large device MEDISEND®super C

## Pulsating electromagnetic field and laserlight

### Frequencies

The **CEPES-Laser®Vario** can be connected to any of the **MEDISEND®super** devices and is supplied with power as soon as the large device is started. When connected, the **CEPES-Laser®Vario** can be switched on with its red button. Like the **CEPES-Laser®**, it always **emits a pulsating magnetic field simultaneously to its laser light**.

However, in contrast to the **CEPES-Laser®** the **CEPES-Laser®Vario** does not have any preset limited selectable frequency programs. Its magnetic field always has the same frequency that is set at the connected large device. This gives the connected laser a frequency bandwidth of 0.1 - 1000 Hz and the possibility to also generate both frequency scans 100 - 1 Hz and 1000 - 1 Hz.

Any further **frequency modulation** that you set with the large device is also transferred to the emitted magnetic field of the **CEPES-Lasers®Vario**.

Besides the different frequencies you can select from (amongst them the frequency **7.8 Hz**, the **main value of the Schumann frequency spectrum**), the **CEPES-Laser®Vario** always also generates the **Geomagnetic frequencies**.

Frequency bandwidth of the large device

Schumann-Geomagnetic- and solar frequencies

For more information about Schumann, Geomagnetic and Solar frequencies as well as the quality characteristics of Dr. Ludwig's devices, please refer to page 4/5.

### Bioinformation

Furthermore, all **exo- and endogenous bioinformation** which are modulated on the magnetic field via the connected **MEDISEND®super** device are also transmitted by the **CEPES-Laser®Vario**. This means that all **exogenous information** that has been placed in the **MEDICUP** as well as the **endogenous (body's own) information** that are tapped by the **hand electrodes** are not only transmitted by the applicator of the large device, but also by the magnetic field of the **CEPES-Laser®Vario**.

Thus, during the use of a large device, you can individually enhance the application by using the punctual properties of the **CEPES-Laser®Vario**.

In case you use the **AMScomsystem** software with **digital information**, the selected **BIOWAVES** are also transmitted with the magnetic field of the **CEPES-Laser®Vario**.

Learn more about the **substrate transfer**, our **large devices** and the **AMScomsystem** software with the **BIOWAVES** on pages 7, 10 ff., 24 ff. or on our website: [info@ams-ag.de](mailto:info@ams-ag.de) / [www.magnetotherapy.de](http://www.magnetotherapy.de)

Transfer of exo- and endogenous bioinformation via MEDICUP and hand electrodes

**NEW MODEL**

## At a glance:

### The CEPES-Laser®Vario...

- Laser with large device → is connected to an **AMS large device of the MEDISEND®super series**.
- Red laser light → **works with red laserlight**. You can adjust the beam's diameter with a slide switch to either approx. 0.7 or 0.2 cm (approx. 0.28 or 0.08 inches).
- transfer of all settings and all bioinformation via the large device → **integrates three tried-and-tested methods:**
  - red light laser
  - pulsating electromagnetic field
  - substrate transfer
- **generates a pulsating electromagnetic field** and transmits all settings and frequencies of the connected large device.
- **transmits analog and digital bioinformation** via the connected large device.
- space for an extra ampule → **has a bore in the housing** for a glass ampule with additional bioinformation for transmission.
- continuous or blinking Light → **has two setting modes:**
  - steady light with a continuous electromagnetic field
  - light and magnetic field are interrupted by a frequency of 1,2 Hz (Nogier frequency)
- versatile usage → **is applicable to** acupuncture points, meridians, skin areas, chakras, scars and more.
- with plug in tip → **has a plug in tip** made of stainless steel for better positioning on acupuncture points. More-over, it is useful to get through the fur of animals for treatment.

Did you know that the depth of penetration of the laser light is independent of the strength but only dependent of its wavelength?

This is why we decided also for our new model to use only a small power of  $\leq 1$  mW.

### your benefit

- no technical inspection needed
- no safety glasses necessary
- low asset costs compared to stronger lasers

Red laser light has a penetration depth of 2 cm (approx. 0.79 inches). The pulsating electromagnetic field that is generated at the same time even has a penetration depth of 30 cm (approx. 11.81 inches).

CEPES-Laser®Vario connected to  
the large device MEDISEND®super III

## Application

For the **application**, hold the beam of the CEPES-Laser®Vario about 1-2 cm / 0.4 - 0.8 inches above the point you want to stimulate. You can see exactly where the laser beam hits the skin and thus make sure you are in the right place.

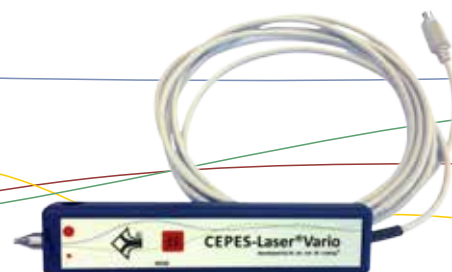

A laser beam that directed at acupuncture points is passed on through the meridians - they work like optical fibers.

If required, you can also place the laser directly onto the skin in order to work more punctually - for this purpose you can use the **plug in tip** made of stainless steel that comes with the laser.

Optionally, you can use the laser beam **bundled** (0.2 cm / 0.08 inches) for a punctual application or **slightly scattered/diffused** (0.7 cm / 0.3 inches) for a wider application. You can adjust the beam's diameter with a slide switch that moves an integrated glass lens in front or away from the laser beam.

The CEPES-Laser®Vario does not produce any kind of heat or warmth on the skin.

Dr. W. Ludwig's® devices are identified with the **arrow symbol**. This symbol stands for generating an electromagnetic biofield as in undisturbed nature. The frequency spectrum of the 64 essential trace elements (Geomagnetic frequencies) is generated by a worldwide unique process.

# CEPES-Laser®Vario

## Technical data:

<b>Laserlight:</b>	fluctuating red wavelength, $\lambda = 650 \text{ nm}$ $p \leq 1 \text{ mW}$ (Laser class 2 according to DIN EN 60825-1: 2008-05)
<b>Magnetic field frequencies:</b>	all frequencies that can be set for the MEDISEND®super devices: 0.1 - 1000 Hz and the frequency scans 100 - 1 Hz und 1000 - 1 Hz
<b>Strength of magnetic field:</b>	0,9 $\mu\text{Tesla}$
<b>Batteries:</b>	power supply exclusively via the battery of the MEDISEND®super device
<b>Weight:</b>	105 g / 3.7 ounces with connecting cable and plug in adapter
<b>Size:</b>	1.8 x 3.4 x 15.7 cm (approx. 0.7 x 1.3 x 6.2 inches)
<b>Scope of delivery:</b>	CEPES-Laser®Vario with connecting cable and plug in tip, manual
<b>Warranty:</b>	2 years
<b>Important to know:</b>	The CEPES-Laser®Vario can <b>only</b> be operated via a large AMS device and <b>cannot</b> be used as an independent device.

## Order number: 108

[www.magnetotherapy.de](http://www.magnetotherapy.de)

## Our Small and hand-held devices

All our small and hand-held devices are useful for the use in a **practice** as well as for **home use**.

They have **preset programs** that you can choose different frequencies from. These can be **stimulating, soothing or balancing** frequencies, or those which have proven to be suitable for **electrosensitive** people.

For the application, simply use one of the available frequencies, put device on or next to your body or put it in your pocket. The magnetic field penetrates the clothing and flows through every cell.

There is an ampule holder that you can attach to the small devices\* in order to use the ability of the pulsating electromagnetic field to **transmit information**.

Into the ampule holder you can slide a **glass ampule with endo- or exogenous information** that you want to **transfer** during the application.

These can be homeopathic remedies, Bach flowers, nosodes or any other substrates.

The information contained in the ampule is transmitted with **any selected frequency regardless** of the preset program of the device.

The small devices\* **switch off automatically** after 30 minutes (10 minutes for the MEDICUR®pro). You can deactivate the automatic shut-off with some of the devices. After the automatic shutdown, you can immediately turn the device back on again - **it is not possible to overdose the application**.

The **physiological range** of all small devices is - depending on the device - about about 30-40 cm / 11.8 - 15.7 inches (diameter (diameter 60-80 cm / 23.6 - 31.5 inches).

Except the MEDISEND®protect\* the small devices are operated with **usual batteries**. They come with so-called **starter batteries** so that you can use them right away. The **endurance of conventional batteries** (depending on the type) is between 3 months and one year, even with daily use.

Our small and hand-held devices are robust, wearless and **maintenance-free**. They are handy and easy to operate. They come with a detailed instruction for use.

On the next pages you will find detailed information and descriptions for each of our „little ones“.

90 days right of return

After purchasing our small devices (order number 100 to 107) you can **return the device within 90 days with a money back guarantee**. You will see this also on our invoice. If you return the device in **perfect condition** within the 90 days, we will give you a **full refund** (less shipping costs).

Arrow symbol

**Dr. W. Ludwig's®** devices are identified with the **arrow symbol**. This symbol stands for generating an electromagnetic biofield as in **undisturbed nature**. The frequency spectrum of 64 important trace elements (**Geomagnetic frequencies**) is generated by a worldwide unique process. For more information about the environmental signals as well as the quality characteristics of Dr. Ludwig's devices, please refer to page 4/5.

\* Applies to all small devices except the **MEDISEND®protect**: The **MEDISEND®protect** does not have an ampule holder or an automatic shut-off and is **not** operated with batteries.

## MEDISEND®

The little Ludwig

### Our smallest portable magnetic field device

You can use the **MEDISEND®** with its pulsating electromagnetic field according to your requirements on lack of concentration, exhaustion, meteorsensitivity, sleeping troubles, electrosensitivity and more.

Many customers call our **MEDISEND®** lovingly „The little Ludwig“ and don't want to miss this small device anymore. It is an everyday companion and is carried around everywhere in jacket and trouser pockets. It fits in your hand and has a **physiological range** of approx. 60 cm (23.6 inches) in diameter.

**MEDISEND®** is the first device with a pulsating electromagnetic field developed from **Dr. W. Ludwig**. It is sold on the market for **more than 40 years**.

**MEDISEND® stimulates and stabilizes the ability of regulation**

### The MEDISEND®...

→ **offers nine different frequencies**, that you can choose from depending on the situation (see table on the left). For the settings night / concentration / day / fitness you find two setting modes. Just try and see which one is the most suitable for you.

→ **allows with the ampule holder** (optional usable with the provided second back of the device) the transmission and transfer of subtrats (e.g. homeopathic remedies, Bach flowers and more).

## MEDISEND®protect

### Computerwork without worrying about electrosmog

#### Function - Application

Electromagnetic waves have a fundamental function and importance for all living beings: They control and regulate the body's „bio-currents“. If they get disturbed and interfered permanently by electrosmog, biologically sensitive control circuits can get out of rhythm.

Modern workplaces are full of electrosmog sources. We sit between computer, laptop, fax, telephone, copier and printer. We are constantly accessible, carry headset, cell phone and beeper, work under neon light, use energy saving light bulbs and there is a cell phone tower nearby. UMTS, WLAN and Bluetooth ensure a fast data transmission - we are always online due to our flat rate.

**Children and teenagers often sit for hours in front of their computer, at the same time chatting on their cell phones or a cordless phone, while listening to music with their earphones.**

More and more people react sensitively to electrosmog. Colloquially we call it „Electrosmog sensibility“. A permanent electrosmog radiation can cause different disturbances.

You simply plug **MEDISEND®protect** into a USB port on your computer / laptop. There it produces an electromagnetic biofield as in **undisturbed nature**. The organism will be oriented to this field and thus will no longer be irritated by the disturbance waves of the computer and other devices around you.

The **physiological range** is approximately 80 cm (31.5 inches) in diameter.

- **MEDISEND®protect** is power supplied by any USB port in your computer / laptop.
- It generates a natural and complex electromagnetic field with 7.8 Hz (principal value of the Schumann frequencies). Of course **MEDISEND®protect** also generates the Geomagnetic frequency spectrum.
- The Schumann frequency of 7.8 Hz is additionally modulated with the frequency of 1.2 Hz. This frequency has proved to be very effective against electrosmog (especially mobile phone radiation).
- Only current is drawn via the USB port; therefore no problems whatsoever are encountered with other user programs on your computer or laptop.
- It can be connected to **any USB interface** - so you can use it for example also in **the car**.

#### Technical Data:

<b>Magnetic field frequencies:</b>	7.8 Hz - modulated by 1.2 Hz
<b>Physiological range:</b>	40 cm / Ø 80 cm (15.7 inches / Ø 31.5 inches)
<b>Batteries:</b>	supplied solely by the current from the computer by the USB port connection
<b>Weight:</b>	15 g (1.5 ounces)
<b>Size:</b>	7.0 x 2.0 x 1.2 cm / 2.8 x 0.8 x 0.5 inches
<b>Scope of delivery:</b>	Device in metal case, manual
<b>Warranty:</b>	2 years

#### Order number: 100

To see the current USD price and place your order please check our website and online shop:

**Producer:**  
Snowden Ltd  
Research & Innovation Centre  
4 Finch Close  
Nottingham  
NG7 2NN  
GB

Generally, each of the preset programs provides a possible **pain relief**.

In addition, the different frequencies have proven their value for certain situations, e.g.:

Frequency	Examples of use
3.0 Hz	<b>relaxation</b> <ul style="list-style-type: none"> <li>benefits relaxation and sleep</li> <li>supports in case of nervousness and sleeping troubles</li> </ul>
7.8 Hz	<b>balancing / stabilizing</b> <ul style="list-style-type: none"> <li>gives power, supports calmness, balance and concentration</li> <li>7,8 Hz is the principal value of the Schumann frequencies and our most important „well-being frequency“. It can be used to energize any food containing water by putting the device next to it for around one minute</li> </ul>
20 Hz	<b>energizing</b> <ul style="list-style-type: none"> <li>sets free power and energy</li> <li>useful for exhaustion, tiredness, debility, lack of energy and more</li> </ul>

## MEDICUR<sup>®</sup> pro

### Mobile pain therapist

#### MEDICUR<sup>®</sup> pro ...

- **is an easy-to-use magnetic field therapy device with three programs.** It has been used very successfully for many years to **relieve pain** and is approved throughout the EU (Medical Product Laws, Class II b).
- **activates the body's self-healing processes** in a natural way and supports its self-regulation. As a possible result, you might need fewer drugs and thus can avoid their side effects.
- **is handy** and hardly larger than a pack of paper tissues.
- **is simply placed onto or next to the body**, on the solar plexus or directly on the affected area. It turns off automatically after 10 minutes. If necessary, it can be switched on again immediately - overdosing is not possible. The **physiological range** is approximately 80 cm (31.5 inches) in diameter.

#### Technical data:

##### Magnetic field frequencies:

3.0 / 7.8 / 20 Hz and

##### Physiological range:

40 cm / Ø 80 cm  
(15.7 inches / Ø 31.5 inches)

##### Battery:

9 Volt block battery

##### Weight:

110 g (3.9 ounces)

##### Size:

11 x 7.6 x 2.5 cm  
(4.3 x 3.0 x 1.0 inches)

##### Scope of delivery:

Device with battery and one spare battery, Velcro<sup>®</sup> strap, manual

## METRONOM solar

### With frequency scan for Zapper functionality

Symbol and chin. element	Frequency	Examples of use
 <b>Earth</b>	Frequency scan 1000 - 1 Hz	<b>Basic program</b> <ul style="list-style-type: none"> <li>• stabilizing of the organism</li> <li>• harmonizing of the autonomic nervous system</li> <li>• Zapper functionality due to harmonic waves up to the megahertz area</li> </ul>
 <b>Fire</b>	33 Hz	<b>stimulating</b> <ul style="list-style-type: none"> <li>• sets energy free</li> <li>• helps against exhaustion, tiredness, debility, lack of energy</li> </ul>
 <b>Wood</b>	7,8 Hz principle value of the Schumann frequencies	<b>balancing / stabilizing</b> <ul style="list-style-type: none"> <li>• gives strength, calmness, balance and concentration</li> <li>• 7,8 Hz is the principal value of the Schumann frequencies and our most important „well-being frequency“</li> <li>• energizes any food containing water by putting the device next to it for around one minute</li> </ul>
 <b>Metal</b>	3,0 Hz	<b>calming / relaxing</b> <ul style="list-style-type: none"> <li>• helps to relax and to sleep, supports against uneasiness and sleeping troubles</li> </ul>
 <b>Water</b>	1,2 Hz	<b>Electrosensitivity</b> <ul style="list-style-type: none"> <li>• helps with sensibility to electric smog</li> <li>• 1,2 Hz is the Nogier frequency and supports relaxation and regulation</li> </ul>

The **METRONOM solar** offers **five different programs/frequencies**, that you can choose from depending on the situation (see table on the left). For usage you simply place the switched on device **onto or next to the body**, on the solar plexus or put it into your pocket.

The **METRONOM solar** combines the most important functions our hand-held devices **MEDISEND®** and **MEDICUR®**. Additionally the **METRONOM**-devices (the **METRONOM solar** as well as the **METRONOM C**) are the only electromagnetic field handheld devices developed by Dr. Ludwig® that offer besides the single frequencies also an automatic **frequency scan**.

Besides the different programs/frequencies you can select from, the **METRONOM solar** always also generates the **Geomagnetic frequencies**. In contrast to the **MEDISEND®** it additionally generates the **Solar frequencies** - regardless with program you choose.

#### Technical Data:

<b>Magnetic field frequencies:</b>	1.2 / 3.0 / 7.8 / 33 Hz and frequency scan from 1000 - 1 Hz
<b>Physiological range:</b>	40 cm / Ø 80 cm (15.7 inches / Ø 31.5 inches)
<b>Battery:</b>	9 Volt block battery
<b>Weight:</b>	121 g (4.2 ounces)
<b>Size:</b>	11 x 7.6 x 2.5 cm without ampule holder (4.3 x 3 x 1 inches without ampule holder)
<b>Scope of delivery:</b>	Device with battery, ampule holder, three glass ampules (10 mm / 0.4 inches), Velcro® strap, manual
<b>Warranty:</b>	2 years

Strengthens the organism with its **frequency scan**. Using this setting, the range of its harmonic waves even reach the **megahertz area**. Hereby the **METRONOM solar** even generates frequencies of Hulda Clark and Royal Rife and this is why it can used as an **alternative Zapper device**. Unlike the stimulation current which is used by usual Zapper devices, the electromagnetic field even reaches the **intercellular space**.

Additionally it **transfers** with the help of the included ampule holder **information** of all kinds of substrats. These substrats can be homeopathic remedies, Bach flowers and more. The electromagnetic field is used as the **carrier wave**. The **physiological range** is approximately 80 cm (31.5 inches) in diameter.

## METRONOM C

### With memory space for bioinformation

The **METRONOM C** is kind of a twin brother of our **METRONOM solar** device.

With its five programs

-  frequency scan with Zapper functionality
-  33 Hz, stimulating
-  7.8 Hz, balancing
-  3.0 Hz, relaxing
-  1.2 Hz for electrosensibility

it has exactly the same application possibilities as the **METRONOM solar**. See the product description for the device on the previous page.

**MEDISEND®super III / C  
and WAVE TRANSFER C  
with AMScomsystem**

The **METRONOM C** is part of the **C-Generation** of the AMS magnetic field devices (more information about the C-Generation on page 8/9). The only difference to the **METRONOM solar** is that it has a memory space where you can store digital bioinformation (**BIOWAVES**).

In order to be able to use the storage space of the **METRONOM C**, it is necessary to connect it to one of our large devices of the C-Generation (**MEDISEND®super III / MEDISEND®super C** or **WAVE TRANSFER C**) with the **AMS-comsystem** software.

Thus, it is possible to store digitized spectra (**BIOWAVES**) as single or complex remedies on the **METRONOM C**. The stored information (**BIOWAVE**) can be patched in optionally with each of the five programs of the **METRONOM C**.

Of course it is also possible to transmit analogous information using the supplied **ampule holder**, just like using the **METRONOM solar**. The magnetic field is also used as a carrier wave. The **physiological range** is approximately 80 cm (31.5 inches) in diameter.

#### Technical Data:

		<b>Magnetic field frequencies:</b>	1.2 / 3.0 / 7.8 / 33 Hz and frequency scan from 1000 - 1 Hz
		<b>Physiological range:</b>	40 cm / Ø 80 cm (15.7 inches / Ø 31.5 inches)
		<b>Battery:</b>	9 Volt block battery
		<b>Weight:</b>	127 g (4.5 ounces)
		<b>Size:</b>	11 x 7.6 x 2.5 cm without ampule holder (4.3 x 3 x 1 inches without ampule holder)
		<b>Scope of delivery:</b>	Device with battery, ampule holder, three glass ampules (10 mm / 0.4 inches), Velcro® strap, manual
		<b>Warranty:</b>	2 years

**Order number: 107**

For an overview of the available **BIOWAVE** packages that can be used with **AMScomsystem** software, see page 27.

[www.magnetotherapy.de](http://www.magnetotherapy.de)

## MEDICUR® color

### Color and magnetic field

#### MEDICUR® color

- **combines seven colors in the form of solar frequency spectra with a pulsating electromagnetic field.** Each selection of a color generates a different frequency. The seven colors can be used individually or in combination (120 possible combinations).
- **has a positive effect on physical and psychological regulation** and can be applied for psychosomatic and neurovegetative sensibilities.
- **optimizes energetic treatment procedures** such as chakra treatment and acupuncture.
- **can be used for substrat transient** with the help of the ampule holder, e.g. for transferring homeopathic remedies, Bach flowers etc. The **physiological range** is approximately 80 cm (31.5 inches) in diameter.

#### Technical Data:

##### Magnetic field frequencies:

120 combinations of different frequencies

##### Physiological range:

40 cm / Ø 80 cm  
(15.7 inches / Ø 31.5 inches)

##### Battery:

9 Volt block battery

##### Weight:

120 g (4.2 ounces)

##### Size:

11 x 7.6 x 2.5 cm  
without ampule holder  
(4.3 x 3 x 1 inches  
without ampule holder)

##### Scope of delivery:

Device with battery, ampule holder, three glass ampules (10 mm / 0.4 inches), Velcro® strap, manual

##### Warranty:

2 years

#### Order number: 106

To see the current USD price and place your order please check our website and online shop: [www.magnetotherapy.de](http://www.magnetotherapy.de)

No.	Color	Frequency	Examples of use
1	Brown	33 Hz	gives vitality and strength
2	Red	19 Hz	stimulating, energizing
3	Orange	17 Hz	gives warmth, balancing
4	Yellow	12,5 Hz	sunlight, supports drainage, cleansing
5	Green	9,5 Hz	supports regeneration
6	Blue	7,8 Hz	principle value of the Schuman frequency, supports concentration, balancing, energizing water
7	Violet	3,3 Hz	soothing, calming, feeling of security, releasing of emotional blockades
4 + 7	Yellow + Violet	1,2 Hz	Nogier frequency, relaxing, helps with sensibility to electric smog
1 to 6	all colors White	129 Hz	support of the complete metabolism

# water treatment

Two thirds of our body's volume consist of water. A water molecule is so small that if you wanted to count all molecules of your body, you would find out that 99% of your molecules are water molecules.

The capacity of water being a solvent in chemical reactions supports the body. It also serves as an information and energy storage.

**This shows two conclusions:**

- Our drinking water should be preferably unpolluted - that is **free of noxious substances**.
- It is extremely helpful if the water also has a **bioenergetically healthy structure**.

For this purpose, on the following pages you will find two products that complement each other ideally:

On the one hand you will find **structure-modified block magnets (SBM)**, which you can easily attach to your **main water pipeline**. These block magnets help to **prevent development of limescale**. The magnets are **structurally modified** according to the method of Dr. Ludwig®. This means that the oscillations of **64 important trace elements** have been programmed into the net ionic structure by enforced transposition (see also explanation of the Geomagnetic frequencies on page 4 in this catalog).

On the other hand you will find a **water treatment device** in our catalog. It is a good idea to purify and clean the water we consume to make it free of harmful substances. The most effective way to do so is the principle of **reverse osmosis**. Please read the following pages for further information and for a detailed description of our **spring-time®420 pro**.

## SBM

### structure-modified block magnets for the water pipeline

The block magnets can be easily attached to the **(main) water pipeline**. It does not require any external personnel in the assembly.

The lime contained in the water is converted into nanocrystals, which attach less easily and thus keep your water pipelines longer free of limescale.

Additionally the block magnets are **structure-modified** according to the method of Dr. rer. nat. Ludwig®.

Structural modification means that the **oscillation spectra of the most important 64 trace elements** are „programmed“ into the magnets and thus modulate the electromagnetic field. They ensure a development of **positive water clusters**.

#### Technical data:

<b>Weight:</b>	approx. 130 g / 4,6 ounces each
<b>Size:</b>	approx. 6.0 x 2.0 x 1.5 cm / approx. 2.4 x 0.8 x 0.6 inches
<b>Remanence Br/ Magnetic field strength:</b>	approx. 1.150 mT
<b>Material:</b>	Nd-Fe-B
<b>Scope of delivery:</b>	Pair of structure- modified block magnets, two cable ties, manual

#### Order number: 600

**NEW**

## spring-time®420 pro

- Water purification by reverse osmosis
- Energizing according to Dr. Ludwig®

Unique combination:

pure drinking water

Tap water goes a long way until it reaches our domestic water taps. On this journey it loses a lot of its quality. Our water is often contaminated with **lead, copper** and other **heavy metals** and even with **residues of pharmaceuticals**. This is why **reverse osmosis filters** are in particularly high demand and enjoy increasing popularity. Due to their **special filter technology** they achieve an **extremely high purification** of the water.

### spring-time®420 pro...

reverse osmosis and  
activated carbon filter →

is a water treatment device which works according to the principle of **reverse osmosis**. In addition to the **reverse osmosis membrane**, the device includes a pre- and afterfilter. The prefilter consists of two components: **sediment** and **activated carbon**. The afterfilter is a **ceramic filter**. This combination **purifies the water of almost all dissolved pollutants**. Furthermore the device includes some electronically controlled, semi-automatic processes for **desinfection and decalcification**.

energization by  
magnetic field →  
(7.8 Hz)

additionally has an integrated **magnetic field generator according to Dr. Ludwig®**, which generates a **pulsating electromagnetic field for energizing** the purified water. As soon as the **spring-time®420 pro** is connected to the power supply, the magnetic field generator (comparable to our **MEDISEND®**) permanently generates the main value of the **Schumann frequency of 7.8 Hz**. Furthermore, with a worldwide unique method the frequency spectrum of **64 important trace elements (Geomagnetic frequencies)** is modulated to the magnetic field and thus transferred to the water.

1.2 liter freshly  
pressed water →  
in 10 minutes

has a removable 1.8 l water tank which will be filled with **tap water**. After 10 min you get approx. 1.2 l freshly pressed water® in organic quality. This results in only about 0.6 liters of waste water collected in the water tank. This ratio is worldwide leading in the household sector. An **integrated display for the molecular conductance** provides information on the **number of dissolved ions in the water** and thus ensures a constant **quality control**. The elegant design can match any kitchen by **interchangeable front panels**.

all you need →  
is a plug socket

operates with a **built-in membrane pump**, that generates the optimal pressure of 6 bar for the filtration process. The **spring-time®420 pro** is **not connected to the water line**, but **only to an electrical outlet**. With 230 Volt you can connect and operate the device wherever you are - whether at home, in a clinic or in the office. With its integrated 12V/ 24V access it can also be used in campers, yachts and abroad. In order to counteract the electrosmog of the power supply system, the Schumann frequency of 7.8 Hz is **additionally modulated with 1.2 Hz** - a frequency which has also proven its positive effects against **electrosensitivity**.

Freshly pressed water®  
in organic quality

this is how  
reverse osmosis  
works

The process of **reverse osmosis** is easy to understand:

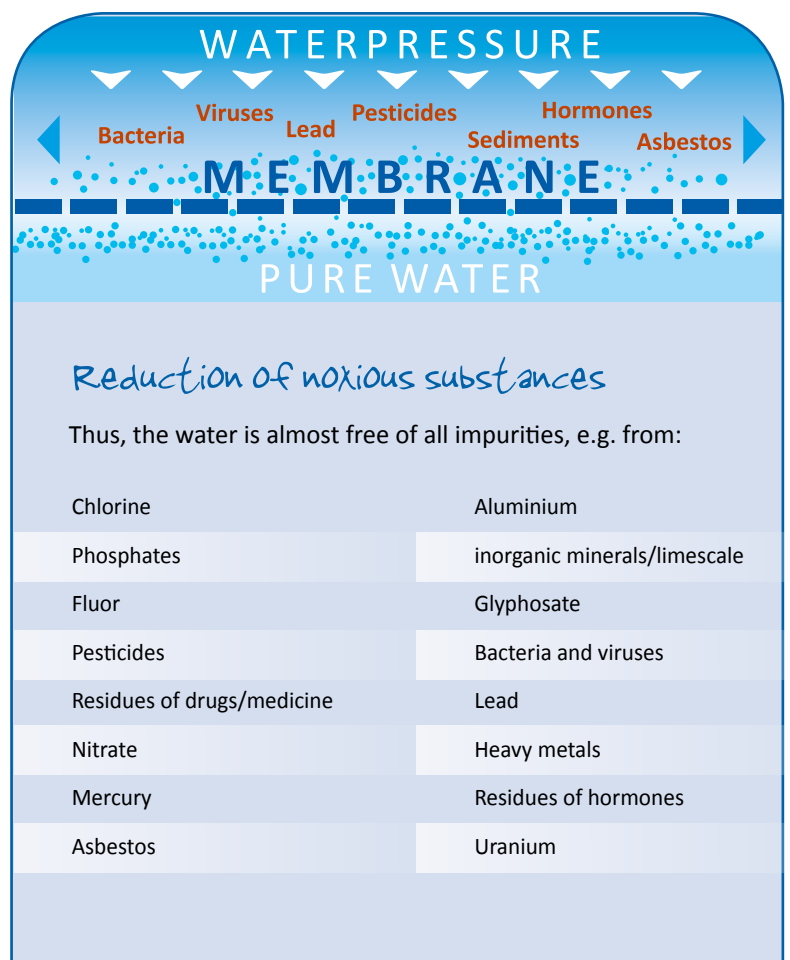

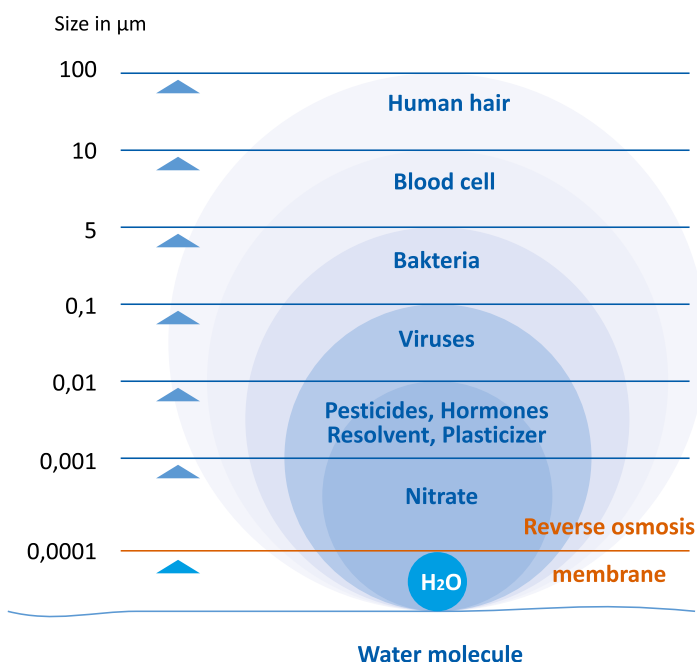

It is an **extremely fine filtration process**, in which water is pressed with high pressure through a membrane with **ultrafine pores**. The pores are so small that they can **only** get passed through by **water molecules**, by **minerals in ionic form** that are smaller than water molecules and by **oxygen**. All other, larger molecules are not able to pass through and thus do not get into the pure, filtered water.

The figure at the bottom left shows the **ratio of size** of possible pollutants to a water molecule. The lower right figure shows schematically the **process of reverse osmosis** and gives examples of which pollutants are reduced up to 100% with the spring-time®420 pro.

The reverse osmosis provides an **optimal cleaning effect**, which is not exceeded by any other filter system. It separates the tap water into **two components**:

**Pure, filtered water** (pure water) and the **tap water remainder** (concentrate). Latter contains all substances that do not pass through the fine pores of the membrane due to their molecular size.

H<sub>2</sub>O molecule size comparison:

**MADE IN GERMANY**

**High quality, pure water  
stimulates drainage and cleansing**

Not all water is the same. **Pure water has more capacity to absorb** the body's metabolic waste products in order to **excrete** them through the kidneys, skin, intestines and lungs. For this purpose, it is helpful to drink pure water that is not contaminated with pollutants or other substances.

pure water  
← helps drainage

The ability of water to transport and excrete substances can also be hindered by **dissolved minerals**. To help **cleansing and drainage** it is best to drink water with a low amount of minerals. For the supply of our body we get sufficient minerals through a **balanced diet**. There is **no reason** to assume that reverse water can lead to a mineral deficiency – especially since the minerals dissolved in the water are **not easily usable** for the body. The minerals naturally contained in food are much easier usable and much **more effective** for the body.

← No fear of  
mineral deficiency

In order to have optimal cleaning and transport qualities, the water should contain **as little pollutants as possible**. It should be **still** and contain a **low amount of minerals**.

The reverse osmosis process breaks the natural cluster structure of the water. In order to support the reconstruction of this cluster structure, it is important to **energize** the water after the purification. With the spring-time®420 pro device the water gets energized **automatically** during the filtering process **due to the built-in magnetic field generator**. It revitalizes the water by generating **7.8 Hz, the main value of the Schumann frequencies**. Additionally various **swirling processes** are integrated, which lead to an energetically high-quality, vital water.

← Vitalizing and  
energizing of  
the purified water

# spring-time®420 pro

## Technical data:

**Water treatment:** Prefilter (sediment / activated carbon)  
Main filter (reverse osmosis)  
Afterfilter (ceramic)

**Energizing of the water:** by a magnetic field generator (7.8 Hz) and swirling

**Weight:** approx. 7.3 kg / 16 lbs

**Size (WxDxH):** 30 x 28 x 34 cm / 11.8 x 11.0 x 13.4 inches (without drip pan)  
Depth with drip pan 37 cm / 14.6 inches

**Water tank:** approx. 1.8 l

**Production of water:** approx. 1.2 l in 10 min

**Filter exchange:** Prefilter every 6 months

**Scope of delivery:** **spring-time®420 pro** device incl. filter, water tank, drip pan with drip tray, organic softening agent, manual, warranty certificate, built-in magnetic field generator

**available as an option:** Decanter, handmade from ecologically compatible glass

**Warranty:** 2 years

**Order No. spring-time®420 pro:** 523

**Order No. decanter:** 524

**Order No. prefilter for exchange:** 525

To see the current USD price and place your order please check our website and online shop: [www.magnetotherapy.de](http://www.magnetotherapy.de)

For many years the worldwide recognized biophysicist **Dr. rer. nat. W. Ludwig** engaged intensively in water and its characteristics. He performed spectroscopic measurements to find out about the water quality.

His biophysical results show:

**Water has a memory.  
It can store information.**

This information becomes manifest in the form of certain frequency patterns in the **cluster structure** of the water and can be **passed on** to other systems or organisms.

With the magnetic field generator installed in the **spring-time®420 pro**, the oscillations of 64 important trace elements (**Geomagnetic frequencies**) are transmitted to the water in addition to the 7.8 Hz.

**Dr. W. Ludwig's®** devices are identified with the **arrow symbol**. This symbol stands for generating an electromagnetic biofield as in **undisturbed nature**. The frequency spectrum of the 64 essential trace elements (Geomagnetic frequencies) is generated by a worldwide unique process.

water  
has a →  
memory

## Glucosamine Gold Gel

### Three natural ingredients for your joints

With the ingredients

- Glucosamine
- Indian Frankincense
- Horse Chestnut

the Glucosamine Gold Gel provides more mobility and soothes stressed joints.

Nurtures skin, joints and the entire musuloskeletal system.

A well-tried combination:

Glucosamine Gold Gel and our magnetic field therapy device **MEDICUR®pro** (p. 47)

Tube / Volume: 200 ml

**Order number: 650**

To see the current USD price and place your order please check our website and online shop:

[www.magnetotherapy.de](http://www.magnetotherapy.de)

## ESM-2

### Electrostress measuring device

measures electrostress in your body

You are under tension when you are in an electric field.

With the ESM-2 you can measure this electrical charge quickly and easily.

Depending on the output shown in the display, you can take measures against the causes or - if you have already taken corrective actions - you can check their result expertly.

#### Technical data:

<b>Battery:</b>	9 Volt block battery
<b>Weight:</b>	180 g / 6.3 ounces
<b>Size:</b>	15 x 9 x 3 cm / 5.9 x 3.5 x 1.2 inches
<b>Scope of delivery:</b>	Device in a case, 1 hand electrode, earthing cable, manual
<b>Warranty:</b>	2 years

**Order number: 801**

To see the current USD price and place your order please check our website and online shop:

## Tensors and accessories

### Ecotensor Med plus / Ecotensor VARIO

#### Adjustable in length

Both tensors are infinitely **adjustable in length** due to their screw threads in the handle. They are used for testing frequencies, homeopathic remedies, Bach flowers and more.

##### Ecotensor Med plus:

Due to the stronger and slightly heavier cork handle the tensor lies comfortably in the hand and makes it easy to feel vibrations. The antenna has a wooden ring with green decorative stone. Optionally a stronger antenna with a metal ring is available.

##### Ecotensor VARIO:

Optically very similar to the Ecotensor Med plus. It has also the proven cork handle, but is slightly lighter than the „Med plus“ described above. Antenna with wooden ring and green decorative stone. The stronger antenna with the metal ring cannot be fitted in the smaller screw thread.

##### Scope of delivery:

Ecotensor Med plus /  
Ecotensor VARIO,  
antenna with wooden ring,  
gilded, adjustable in length  
between 40 und 57 cm /  
15.7 and 22.4 inches,  
transport package

##### Ecotensor Med plus:

**Order number: 701**

##### Ecotensor VARIO:

**Order number: 702**

To see the current USD price and place your order please check our website and online shop:

[www.magnetotherapy.de](http://www.magnetotherapy.de)

### Scanning sensor Connecting sensor for the Ecotensor Med plus and Ecotensor VARIO

The scanning sensor with cork handle can be connected to the Ecotensor Med plus and the Ecotensor VARIO. Thus you do not have to touch the specimens to be tested with your hand.

This simplifies the work with the tensor.

##### Scope of delivery:

Scanning sensor with cork  
handle and gilded tip.  
Cable approx. 80 cm / 31.5 inches

##### Order number: 703

To see the current USD price and place your order please check our website and online shop:

[www.magnetotherapy.de](http://www.magnetotherapy.de)

## Accessories

For certain products, the accessories shown are included in the scope of delivery - for example, the **ampule holder for the small devices** or the **plug in tip for the CEPES-Laser®** is **sent automatically** with the order. You don't have to purchase them extra. However, it is certainly good to know, that these small parts can easily be ordered if needed.

Depending on the model, at least **one applicator** for the application of the pulsating electro-magnetic field is included in the scope of delivery of the **large devices**. Other accessories, e.g. the **MEDICUP**, **hand electrodes** or additional applicators such as the **MAGNETO-point** is **available optionally** and must be purchased separately. We have always given the complete scope of delivery for each device - please refer to the specifications if necessary.

If you are not sure or need help, do not hesitate to contact us by e-mail ([info@ams-ag.de](mailto:info@ams-ag.de)). We are happy to help you.

### Good to know:

The accessories with the order numbers: 501-509 as well as 518 and 651 are suitable for the large devices **MEDISEND®super**, **MEDISEND®super C** and **MEDISEND®super III**.

To the **COLOR-Punctur** it is only possible to connect the accessories with the order numbers 501 - 503 and 651.

The **aluminum case** (order no. 530) fits the **MEDISEND®super/C**, **COLOR-Punctur** and **WAVE TRANSFER C** devices. The **MEDISEND®super III** requires a larger suitcase. If you need one have a look for so-called pilot-suitcases.

### 501 MEDICUP / small

Bipolar cup for exogenous information transfer (e.g. homeopathic remedies)  
Height approx. 7 cm / 2.8 inches  
Ø approx. 5,5 cm / 2.2 inches )  
incl. connecting cables (approx. 18 cm / 7.1 inches)

### 502 MEDICUP / high

Bipolar cup for exogenous information transfer (e.g. homeopathic remedies)  
Height approx. 14 cm / 5.5 inches  
Ø approx. 5,5 cm / 2.2 inches )  
incl. connecting cables (approx. 18 cm / 7.1 inches)

### 503 One pair of hand electrodes

For endogenous information transfer (body's own information)  
incl. connecting cables (approx. 2 m / 6.6 foot)

### 504 MAGNETO-Point

For treatment of small areas  
Ø approx. 3.3 cm / 1.3 inches  
connecting cable approx. 90 cm / 35.4 inches

### 505 Flexible MAGNETO-Ring

For large area treatment.  
Especially useful in veterinary medicine for treatment of for example, horses.  
Already included in the **MEDISEND®super III** system.  
connecting cable approx. 2.7 m / 8.9 foot  
Ring-Ø approx. 50 cm / 19.7 inches

### 506 MAGNETO-Loop

Included with **MEDISEND®super** and **MEDISEND®super C**  
cable length approx. 2,8 m / 9.2  
Loop Ø approx. 13 cm / 5.1 inches

**Are you a veterinarian or naturopath for animals?**

Further accessories for the veterinary area can be found in our complementary **brochure for animal therapists**.

**530 Shock resistant aluminium case**

Particularly suitable on the road.

Fits for **MEDISEND®super**,  
**MEDISEND®super C**, **COLOR-Punctur**  
and **WAVE TRANSFER C**  
without any contents

**518 One pair of extension cables**

For the animal applicators during application  
on large animals  
cable length approx. 2.9 m / 9.5 foot

**509 One pair of animal applicators**

Especially for veterinary use for endogenous  
information transfer. For connection to  
**MEDISEND®super**, **MEDISEND®super C**  
and **MEDISEND®super III**  
cable length approx. 2.9 m / 9.5 foot

**651 Battery charger for practice devices**

The suitable charger for all large  
AMS devices. Available  
with different plugs  
for various countries.

**512 Ampule holder for MEDICUR® pro,  
METRONOM solar, METRONOM C  
and MEDICUR®color  
(incl. 3 glass ampules)**

**528 Plug in tip for the CEPES-Laser®**

For better positioning on acupuncture  
points. Moreover, it is useful  
to get through the fur  
of animals for treatment.  
Made of stainless steel.

**Glass ampules**

For information transfer

526 Pack with **50 pcs.**

526 Pack with **10 pcs.**

**525 Prefilter for spring-time®420 pro**

Change interval: Every 6 months

**524 Decanter for spring-time®420 pro**

Decanter, handmade from ecologically  
compatible glass

## Payment terms

### Germany:

Payment in advance/  
Direct debit (3% discount)  
Cash on delivery (3% discount plus 2,50 €  
cash on delivery charge)  
redit card (Master/Visa)  
PayPal  
Each plus postage and packing costs

### Abroad:

Sales tax may be additional  
Payment in advance/  
Direct debit (3% discount)  
Credit card (Master/Visa)  
PayPal  
Each plus postage and packing costs according to distance and weight.

### Time of delivery

(Home and abroad): hand-held devices approx. 3 days, large devices approx. 1 week.  
The goods remain our property until they are fully paid for. The right to return unpaid goods is excluded.

### Bank account:

Volksbank Main-Tauber BLZ 673 900 00  
Account-No. 70 69 98 00  
IBAN: DE95 6739 0000 0070 6998 00  
BIC: GENODE 61 WTH

### For transfer from abroad:

S.W.I.F.T.-Code (BIC): GENODE 61 WTH  
IBAN: DE95 6739 0000 0070 6998 00  
Bank headquarters: D-97877 Wertheim, Germany

## General business conditions

**Dated: 01.10.2017**

### 1. Delivery time

Ordered goods will arrive within max. 3 working days. We may point out different delivery times on the respective product page.

### 2. Right of withdrawal

You have the right to revoke this contract within fourteen days without stating reasons.

The period of revocation shall be fourteen days from the date on which you or a third party you designate (which is not the transport service) takes possession of the product.

In order to use your right of revocation, you have to inform us by a clear statement about your decision to revoke the contract – i.g. by mail, e-mail or fax to: AMS GmbH, Hauptstr. 26, 97990 Weikersheim, GERMANY, Tel.: +49 (0) 7934 / 993489-0, Fax: +49 (0) 7934 / 993489-44, e-mail: info@ams-ag.de

In order to maintain the revocation period, it is sufficient that you send the notification of revocation before the end of the revocation period.

### 3. Consumer Dispute Resolution Act

The Consumer Dispute Resolution Act (VSBG) does not apply to AMS due to the number of employees. The AMS does not participate in an alternative dispute resolution with a conciliation committee.

### 4. Payment methods

Options for payment are: In advance (you will receive the invoice as a PDF file with the order confirmation and the necessary details of our bank account. We will deliver the goods after your payment to our account.), COD (only possible in Germany and only possible by transport with GLS), Paypal (you have to be registered with Paypal or you have to register first, legitimize with your access data and confirm to us the order to pay) and by invoice (this option is only for existing customers).

### 5. Disclaimer

The use of the products offered is at your own risk. The products do not replace the examination and treatment by a doctor or a naturopath. None of the products except the MEDICUR®pro product is a medical device as defined in the Medical Devices Act.

### 6. Reservation of proprietary rights

The goods remain the property of the company AMS until complete payment.

### 7. Storage of data

According to § 28 of the Federal Data Protection Act (BDSG), we draw your attention to the fact that the data necessary for the transaction processing are processed and stored using an EDP system according to § 33 (BDSG). Personal data will, of course, be kept confidential and will not be passed on to third parties.
