MEDICUR®color

use for:

- ability of regulation
- neurovegetative strength
- energizitation
- energetic procedures

Colors and Magnetic field

By selecting the colors, you make the device generating a pulsating electromagnetic field at different frequencies. Use the **MEDICUR®color** to support regeneration and neurovegetative strength and to energize yourself.

In contrast to our other hand-held devices, the selection of the program/magnetic field frequency of the MEDICUR®color does not depend on an assessment of the situation (e.g. energizing when being tired, calming anxiety or helping sleeping problems), but purely through an intuitive selection of one or several colors, which operate in the form of different magnetic field frequencies. Each color generates a specific frequency. The combination of different colors gives the MEDICUR®color a bandwidth of 120 different frequencies that can be set.

Of course, you can check and verify your selection with a testing method (tensor, kinesiology, EAV, etc.), but it has proved to be efficient to follow and trust your own intuition.

For usage you simply place the switched on device onto or next to the body, e.g. on the solar plexus or put it into your pocket - it is about as large as a package of tissues and has a physiological sphere of about 80 cm (31.5 inches) in diameter.

seven colors and magnetic field -

supports the body's_ ability of regulation **combines seven colors** in the form of solar frequency spectra **with a pulsating electromagnetic field**. Each selection of a color generates a different frequency. The seven colors can be used individually or in combination (120 possible combinations).

has a positive effect on physical and psychological regulation and can be applied for psychosomatic and neurovegetative sensibilities.

optimizes popular energetic treatment procedures such as chakra treatment, color therapy and acupuncture.

Schumann-Geomagnetic and Solar frequencies

generates different frequencies, amongst them the main value of the **Schumann frequency** spectrum of 7.8 Hz (by selecting the color blue). It also always generates the **Geomagnetic frequencies** (Yin-Signal) and the **Solar frequencies** of the chosen color(s) (Yang-Signal) - regardless wich color you choose. You find more information about Schumann-, Geomagnetic and Solar frequencies inside this brochure.

can be used for substrate transfer with the help of the ampule holder, e.g. for transferring homeopathic remedies, Bach flowers etc. For this the magnetic field is used as a carrier wave.

The MEDICUR® color is not a medical device according to the Medicinal Devices Act. It can only affect positively your ability to regulation and it does not serve to treat or cure diseases.

The devices that are developed by Dr. W. Ludwig® are identified with the arrow symbol. This symbol stands for generating an electromagnetic biofield as in undisturbed nature. The frequency spectrum of the 64 essential trace elements (Geomagnetic frequencies) is generated by a worldwide unique process.
